

More Farmers Will Participate in AAA During Year 1940

The 1939 farmers earned probably about 70 per cent of the possible earnings for participation in the AAA program. In other words, not all farmers carried out practices to earn the maximum payment that could have been earned for their particular farm operations. Because of one more year of experience and familiarity with the program, a higher percentage of participation is expected for 1940.

Providing ground limestone under a grant-of-aid arrangement will increase Washington county farmers' earnings. Inclusion of the new arrangement pertaining to limestone in the program is one of the most constructive developments that has taken place in the triple A program. Washington county soils are not especially deficient in lime but generally show that an application of some form of lime will be beneficial, particularly to our legume crops, and in many instances will make the use, especially of phosphate fertilizer, more profitable.

Probably no more treble phosphate will be used in 1940 than in 1939. The use of this latter material will however, undoubtedly be on a somewhat different basis than in the past year. Considerable treble phosphate in 1939 was used on soil, under conditions, and for crops where profitable increased returns could not have been expected. The use of both lime and phosphate is a specific soil problem and use of these two materials should depend upon either a soil test or upon field trials.

Total possible earnings in 1940 referred to do not take into consideration anything in regard to the vetch and pea seed purchase program of the AAA. This latter program, originally developed as a loan program, has been changed to an outright purchase plan. Under this provision the grower will now be able to sell his Austrian field pea and hairy vetch seed to the federal agency at the designated prices providing it meets the specifications pertaining to purity and germination and still further providing that the operator is in compliance for 1940. The term "in compliance" will probably mean that the wheat acreage allotment, if there is one, for the farm shall not be exceeded. The same applies to a potato acreage allotment. Farms that fall into either of the two above allotment classifications also have a soil depleting acreage allotment which cannot be exceeded if the grower sells his legume seed to the triple A.

Determination of performance and compliance began in Washington county last Monday, May 20. Nearly 20 supervisors, who have worked on this phase of the program for from hdmllybou ob ae Ft- la i hlahto 1 to 5 years, will be in the field for the next month checking each individual farm that is listed to determine what was done and list the acreage of various crops. The county committee anticipates this work will be completed in ample time to permit certification for each grower who is eligible and who may desire to sell his hairy vetch and Austrian pea seed crop to the federal agency. Growers quite generally understand that these sales are not made in advance of harvest but are only made after the seed is in the bag. Incidentally a definite announcement has been made by N. C. Donaldson, executive officer of the state committee, that all seed purchased by the AAA agency must be packed in cotton bags. The use of these cotton bags represents a new development and is utilizing surplus cotton. This phase of the program will mean that the southern cotton grower buying Oregon grown pea and vetch may get his seed in bags made from the cotton he himself grew.

I have learned silence from the talkative, toleration from the intolerant, and kindness from the unkind; yet strange, I am ungrateful to those teachers.—Kahlil Gibran.

The more we know, the better we forgive; Whoe'er feels deeply, feels for all who live.

—Mme. DeStael

KINTON

The home of Mr. and Mrs. O. T. Murphy of Beaverton route 1, was the scene of a beautiful wedding Sunday, June 2, when their daughter, Helen, became the bride of John Glodt, son of Mr. and Mrs. Louis Glodt of Forest Grove.

The wedding service was read by Rev. J. R. Jeffery of Tigard. Preceding the ceremony, Alfred Boyles sang O Promise Me and I Love You Truly, accompanied by Mrs. Anna Neill at the organ and Ray Olson, nephew of the bride, on the violin.

The bride, given in marriage by her father, wore a dress of white lace with a finger tip veil of net and lace falling from a halo of seed pearls. She carried a shower bouquet of sweet peas, roses and bouvardia. Miss Dorothy Damm of Molalla was bridesmaid and wore pink organza. She carried a bouquet of pink snapdragons and sweet peas. Robert Murphy, brother of the bride was best man.

A reception followed the ceremony. The bride cut the wedding cake. Assisting about the rooms were Misses Gladys Greenlee and Helen Pearson of Hillsboro and Mrs. B. H. Bowling of San Bernardino, Calif.

For going away the bride selected a green redingote with white accessories. She wore a corsage of gardenias. After a short honeymoon in British Columbia the couple will be at home in Gresham where the bridegroom is in business.

Mr. and Mrs. E. H. Bowling of San Bernardino Calif., arrived Saturday at the O. T. Murphy home to attend the wedding of their niece, Miss Helen Murphy, which took place on Sunday. They returned to their home Tuesday. Mrs. O. T. Murphy accompanied them for a short visit.

At the yearly conference of the Evangelical church held at Yakima recently the Rev. A. R. Schmale was appointed as pastor to serve the Kinton and Tigard churches during the next year.

Childrens Day will be observed on June 16, instead of June 9. A special collection for missions will be taken that day.

Mrs. Mary Kershaw of Portland, a former resident of this community visited old time friends here last week.

Mrs. J. Charles Owens and son, Charles Edwards, of Portland, are visiting her grandmother, Mrs. T. C. Hawley, and her parents, Mr. and Mrs. E. W. Van Horn.

Wednesday and Thursday guests at the home of Mrs. Harry Richards were Mr. and Mrs. George Richards, Mrs. Mary Williams and daughters of Clackamas, Guy Wilson of California, and Mr. and Mrs. Robert Richards of Aloha.

Roberta Gembella returned to Clackamas with Mr. and Mrs. George Richards for a weeks visit on Sunday.

Tolerance is good for all or it is good for none.—Burke.

WHITFORD

There were thirty two present at Sunday School. G. T. Allen of Portland was present and made an interesting talk on Sunday School work in which he is engaged. James Martin of Portland at present, but who has recently come from Dallas, Texas, delivered the sermon at church. Mr. Martin is a graduate of a Theological University of Dallas. There were thirty three present.

Mr. E. E. Swenson of Portland, formerly of this community visited friends here the past week.

Mr. and Mrs. Dick Hempcke and family of Sylvan, visited Mrs. Hempcke's father, C. R. Gardner and Mr. and Mrs. Bud Doyle one evening recently.

Mr. and Mrs. Otto Nicholson and son Ernest and wife of Portland, formerly of this community, visited Crescent Grove cemetery Memorial Day.

Merle Warner was a guest Sunday evening of Mr. and Mrs. Bud Doyle. Mr. and Mrs. Claus Erickson of Hebo, visited home folks and Crescent Grove cemetery Thursday. Mr. Erickson grew to manhood in this community.

A number of young people in this community are attending the Bible School in Beaverton.

World's Nitrate Supply Is Obtained From Chile

Chile has a population of 4,600,000, or approximately that of Massachusetts, on an area more than 34 times that of Massachusetts. It supplies all the world's natural nitrate, as well as 90 per cent of the iodine, almost half the borax and 18 per cent of the world's copper.

It borders the southern Pacific coast of South America running almost north and south for 2,627 miles, and varies in width from 105 to 223 miles. Inland it is bounded by the lofty crest of the Andes, the background of all Chilean panoramas and possessed of vast waterpower.

If Chile occupied the same latitude in the northern hemisphere it would extend from the latitude of Jamaica through Cuba, Florida, the rest of the United States and Canada to the southern shores of Hudson bay, says the National Geographic society. With the varied climate thus afforded, Chile has widely diversified scenery and economic interests.

Frequent dust storms, mirages and often frost at night feature the hot, arid section of northern Chile, which for many years has furnished most of the country's revenue.

The nitrate fields stretch for several hundreds of miles along the western rim of the upland plains, the deposits being not more than 20 to 30 feet below the surface. Chile's mineral exports account for more than 75 per cent of the total, the United States taking one-fourth, including practically all the iron ore.

Veteran Workers of Oil Company Retired on Pay

Because there has been so much talk in recent months about the old-age pension plans, with various types of retirement programs proposed and fostered by different groups, an interesting bit of news is found in the announcement made today by Albert E. Horn, Jr., Northwest resident manager for General Petroleum Corporation, that the company he represents has just retired 21 of its veteran workers on liberal monthly pay checks with paid-up insurance policies for the benefit of their dependents.

A. E. HORN, JR.

"At a recent annual meeting of one of the 10-20 Year Clubs of our company," he said, "a number of these 21 retiring members were further rewarded for their years of effort when they were presented with honorary service emblems and complimentary letters from President John A. Brown of Socony-Vacuum Oil Company, Inc. and President A. L. Weil of General Petroleum Corporation.

"Those retired on pay this year, at the age of 65, represent only about 10 per cent of the number that has been retired by our Mobilgas organization every year since 1931. Our company has had a pension program in effect ever since 1926, and from time to time it has been revised and made more liberal. As a matter of fact, similar plans are maintained by various American companies. Therefore, the pension system is not new in the industrial field, although it is seldom mentioned in print."
