some disease—perhaps sleeping sickness! Transactions on the New York Stock Exchange one day recently dropped to 130,000 shares, the lowest for nearly 25 years. Brokers show the London Stock Exchange—even while being bombed—is steeper and more active than ours. They, however, do not tell you that the London Exchange may be pegged by the government and—if the war continues long enough—the British Government will have bought a majority of the shares of most of the English Corporations.

Of course, the New York Stock Exchange figures do not tell the whole story. A vast amount of "over-the-counter" and private sale business is being carried on. Every day the United States and Canadian public are becoming more and more the owners of America's industries. Besides, as a rule, when New York Stock Exchange transactions are very low it is a good time to buy securities, commodities, and land. I am returning from my trip bullish on carefully-selected stocks and productive Canadian real estate, whoever is elected in November!

**Attitude Toward War**

Well, I must tell you the truth about my attitude toward war. In all my addresses, I would at some point insist that the United States should not let England be destroyed. I explained that the British navy would never desert the Island. Hence, if we should let Hitler overrun England, we would lose the British navy, upon which our safety depends. Hence, for selfish reasons,—to say nothing of moral reasons—we should come to the rescue of Great Britain on November 6 at the very latest.

When I made the above statement in New England, the audience applauded before I got it out of my mouth. When I was in Chicago and Kansas City I got some voluntary applause. In San Francisco and Los Angeles, however, I had to ask for applause! They were all for going over and licking Japan. Some group—whether political or military men, I do not know—had told these people that on account of Germany's careful advance preparations and vastly superior air force, England is beyond help. They foret that while airplanes may win battles, character wins wars! The English have vastly superior character—and we should not forget the ultimate power of the blockade.

**A Closing Thought**

This brings me to the thing that bothered me most about the trip. It was this: Too many people talk only money, crops, wages, profits, and other things of temporary value. In fact, by the time I was at Los Angeles ready to take the train home I was very unhappy and wondering how it all would end. But that last night something happened I was taken to a most wonderful pageant of the life of Christ called "The Pilgrimage Play." This answered all my questioning and removed all my doubt. It seems as if God led me to see this on my last night of a long and solemn trip.

The New Treatment for Foot Troubles

"Foot defects cause leg and many back troubles, Neuritis, Muscular Rheumatism, Impaired circulation and painful nerve functions. This is the statement of many eminent physicians. Dr. O. O. Fletcher, Jr., Swetland Bldg., 5th and Washington, Portland, Oregon, has substantiated that fact by clinical demonstration and has originated and perfected Scientific Orthopedic Adjustments for the Feet. Immediate relief is obtained even by the first treatment. The principles of treatment are absolutely new and original and the results are astounding and most phenomenal. It is accomplished solely by scientific adjustment and manipulation, without pain and requiring no surgery.

Dr. O. O. Fletcher, Jr., has demonstrated his Scientific Orthopedic Adjustments of the Feet on several hundred difficult cases all of which have responded wonderfully and have brought a flood of inquiries from patients from all parts of the United States.

Dr. Fletcher offers a complete service in the profession including treatment of corns, bunions, callosities, straightening of crooked feet and in fact everything that may affect them. There is nothing hypothetical about the conditions found and the results obtained. This is proven by the statement of many of Dr. Fletcher's patients whose letters have been put in his possession.

**Danger Lurks in these 1940 Census Figures**

THE FACT THAT Washington, D. C., registered a greater gain in population than any other large city in the country during the past ten years has been the cause of considerable comment. The 1930 population of the Nation's Capital was 486,869. According to the Census Bureau, the 1940 figure is 663,153, representing a gain of 38 per cent.

If government workers and their families living in nearby Maryland and Virginia were included, the increase would be much greater. One thing is certain, the larger Washington grows, the worse it will be for the rest of the country.

The more government workers enrolled, the higher taxes will go; the more power the Federal government arrogates to itself, the less power there is left for the state and individuals; the greater the army of bureaucrats becomes; the greater the decline in the liberties enjoyed by the whole people.
