Why We Price Fruits and Vegetables By the Pound

1. You can make a true comparison of values — a pound is the same everywhere.
2. Whether you shop early or late — you get the same value, for the price per pound is the same to all.
3. You can choose the exact weight and quantity you need and pay only for what you get (and no more). Buying vegetables for soup is a good example of this.
4. In citrus fruits, the juice content determines the value to you. Juice weighs heavy, pulp and skin weigh light. Therefore, regardless of size, the weight tells you the best value immediately.
5. Pricing by weight means savings for you, because we can make savings which we pass along to you. For instance, tops are cut off root vegetables at the farm, saving on shipping and hauling expense; also, bunching and tying costs are saved. Then too, our buyers can concentrate on getting the best available can concentrate on sizes, to advertise at so much per each. You select the size you want, and pay according to weight.
