WARNING!

On the night of October 31, 1941, at about 10 p. m., the U. S. Army Air Corps will simulate an attack on Portland and neighboring cities. In order to assist in this maneuver and to prepare this county for possible emergency, the Washington County Defense Council requests your cooperation in effecting a black-out of the county at this time. You will be of the greatest assistance if you follow these precautions: On the sounding of the black-out signal, which will be three short blasts of whistles repeated three times and the ringing of church and school bells in the rural areas, all external lights in your homes and places of business should be turned off. Windows should be covered so that lights left on inside will not show. If shades are not sufficient, cover the windows with blankets. If you must be away from your premises, do not leave any light visible from the outside. Do not pull the main switch. Do not light matches, if outside. If driving your car at this time please pull well off the road to avoid accidents and extinguish your light. Do not proceed until the all-clear signal is given. Avoid parking near hydrants and intersections. Stay off the streets and highways as far as practicable, as they may be needed for emergency runs. Please do not use your telephone immediately preceding or during the black-out, unless essential, as they will be necessary for observation posts, police, fire departments, and other defense agencies. When the all-clear signal of three long blasts repeated three times is sounded, it will indicate that the black-out is ended. WASHINGTON COUNTY DEFENSE COUNCIL

Stock Selling Below Value Babson Says

New York City, October 24—There are half a dozen simple rules which every investor should consider when buying stocks. These are: (1) Prefer companies without debt or embarrassing preferred issues. (2) Prefer companies with natural resources, real property, or marketable equities. (3) Prefer companies with good will, trademarks, and assets which are difficult to duplicate. (4) Prefer companies which cater to consumers and enjoy a "repeat" business. (5) Prefer companies whose issues are selling for not in excess of their book value. (6) Prefer companies with a satisfactory earning record. (7) Be sure that directors and officials are men of high character, sound judgment, with a personal financial interest in the company. Secretary Morgenthau's Theories. Most readers know that the market had quite a break following the recent statement of Secretary Morgenthau regarding taking away all earnings of companies in excess of 6%. If he would guarantee 6% to all legitimate companies, or even guarantee the continuance of what they are earning up to 6%, this would be something to discuss. To say, however, that a businessman should take all losses on existing and new enterprises and then have the profits on the one that does make good limited to 6% on the capital invested is, of course, fundamentally unsound. This was the argument first used by the Russian radicals in bringing about Communism and later by Hitler and his crowd in bringing about Nazism. I do not for a minute fear that Congress will adopt any such crazy legislation. It would be much harder on small businesses than on large ones and be the end of new enterprises. This, I have already stated through these columns. It, however, should be recognized that the Treasury Department is thinking along these lines. The Good Book says, "as a man thinketh in his heart so is he." This means that it is not what we accomplish so much as it is what we think. It is much better to think good thoughts and fail temporarily than to think wrongly and temporarily succeed. Hence, this week's message. Investors Can Buy Insurance. County Budget Shows Increase in Expenditures

Washington county's January 1 to June 30, 1942, budget requiring a total of 233,208.85 to be raised by taxation, will be presented to the taxpayers November 17 in the county court room. Faced with a heavier expense load for the first six months of each year, the half-year total compared to the 1941 full year budget of \$408,871.30 shows an increase in expenditures. The added expense of drafting two budgets in one year, necessitating extra bookkeeping in assessing and tax collecting, and the raising of several county employee's salaries to put all on a uniform scale were given as increases in the figures. For the first time in the county's history of public assistance expenditure, a reduction from \$39,763.23 to \$34,250 has been made. Elimination of \$8,750 to set up a revolving fund last year for purchase of food stamps made possible the decrease. Embraced in the budget total is general fund \$44,596.50, school fund \$51,848.35 and road fund \$136,764. Despite a tax collection decrease for the first half of the year under a new assessing schedule which accompanies the revised fiscal year, Washington county will not be required to issue warrants or bonds, being on a cash basis and a carry over of cash on hand at the first of the year 1941.
