Harvest Dance Cedar Mills October 25th

Cedar Mills Community club will give a hard-times harvest dance October 25th. (Saturday night) at the Grange hall in Cedar Mill. Secure tickets from any club member or Cedar Mill stores.

"Can you serve company?" asked the mistress.
"Yes, mum—both ways," replied the new maid.
"Both ways?"
"Yes, mum. So they'll come again or so they'll stay away."

Triangle Features National Feed Week

Cooperating locally, the Triangle Milling Company of Portland, Oregon, is joining hundreds of other feed manufacturers throughout the nation in observing National Feed Week—October 20th to 25th.

Wrapped into the slogan of the week—"National Defense demands Better Feeds, Better Feeding"—is the gigantic role which the agricultural interests of the United States play in the tremendous program for defense which has been undertaken by the Nation.

"The feed industry and agriculture are moving ahead hand in hand in accomplishing their end of national defense," according to Theo. Schommer, manager of the Triangle Milling company. "Food plays a vital part in a world at war. The tremendous task of building up adequate food reserves and present supplies has been delegated to the farmers of America."

Mr. Schommer indicates that the feed manufacturer and dealer realizes the gigantic task which agriculture has been called upon to perform. According to Mr. Schommer, the feed industry has renewed its effort to help the farmer to do a better job in producing milk, eggs, butter and meat.

"The feed industry today is better qualified than ever before to help the farmer of America get top results," says Mr. Schommer. "For more than 50 years the feed industry has carried on extensive research to produce improved feeding rations which will help the farmer do a better job and gain more profits."

The results of this research are available to you through your local Triangle Feed dealer—the Findley Milling Co. This firm will be glad to help farmers of this community with dependable advice on their feed problems.

"Better feeds, which are abundant in essential elements needed for maximum nutrition, are now available to the farmer at reasonable cost."

A National Hardware Store

Research has improved feeds and feeding practices so greatly that in the last 20 years the average annual egg production per hen has jumped more than 30 per cent in the United States. Similarly, the average milk production per cow has jumped almost 400 per cent. Quality feed has been largely responsible for these gains.
