More Warcrops Wanted

Oregon wheat growers are asked to divert as much wheat acreage as they can to crops more needed in the war effort. Approved Warcrops which can be substituted for wheat to qualify a farm for production adjustment payments under the 1943 AAA program, include cover crop seeds such as Austrian peas, Willamette vetch, Common and Hungarian vetch, hairy vetch and common ryegrass, sugar beets, flaxseed, dry beans and dry peas. Payments will also be conditioned on the farm's 1943 war crop goal being met.

Wings of Victory

Electricity helps make America's war planes some of the world's most deadly weapons. Here are a few of the ways in which G-E equipment serves in the air.

1. Lamps are the eyes of the plane at night, ranging in size from cockpit lamps no larger than a pea to landing lamps of more than half-a-million candlepower.

2. Radio combines the voice and the ears of the plane, allowing communication between the pilot and his squadron, and the ground and sea forces.

3. Instruments are the sensitive brain that relays messages to the pilot from all parts of the ship and helps him to control the plane in its flight.

4. Superchargers are the lungs of the plane, pumping extra oxygen to the carburetors, giving our planes the altitude so necessary to modern warfare.
