This is a hint to the WAACS, WAVES and SPARS! We Need More Good Soil

The real difficulty with our food situation is the impoverishment of our soils. For years, the cutting down of forests has caused a soil erosion which is a basic cause of the farmers' troubles. Then our big cities began to grow and they added to the difficulty. The beef and crops which require the necessary minerals were shipped off the farm to the cities. Following their consumption these necessary minerals went down the sewers of these cities into the ocean. Farms have also suffered from automobiles since farmers began to buy gasoline. Thus there is no refuse from the horses and the necessary cover crops of hay and oats were lost, all of which had heretofore built up the soil.

Now the country has gone crazy over synthetics and is bragging about the manufacture of synthetic rubber, synthetic plastics and synthetic textiles, all of which will rob the soil still further. The farmers are fighting to have the rubber made from alcohol; while the oil men want to sell petroleum. For every ton of rubber made—either from alcohol or petroleum—we are robbing our grandchildren at a criminal rate. This craze for synthetics may easily become an important factor in the downfall of America.

We Need More Manual Workers
I have a great many letters from young people wanting jobs, but very few want to work with their hands except to press the keys of a typewriter or some other machine. As a result, we are getting to an actual shortage of manual workers. The real reason that John L. Lewis has been able to hold up 136,500,000 people is because his Union is made up exclusively of manual workers, namely, the miners. No labor union, consisting of those doing work which we can do ourselves, could hold us up. Hence, we should get back to the soil, and be less dependent upon the labor of others.

The simple truth is that all of us were designed to do some manual work in order to live healthy, courageous and useful lives. In the long-run, we people cannot hire others to exercise for us and do all our manual work any more than we can hire others to eat for us, sleep for us or breathe for us. If you want further advice on this subject read the eleventh verse of the fourth chapter of I Thessalonians and the tenth verse of the third chapter of II Thessalonians, which were the first books written for the New Testament. Whether our educational system is to blame for today's dangerous tendencies, I do not know; but they must be corrected or we will end up with John L. Lewis, or someone else who controls manual labor, the dictators of America. Labor union control can be prevented only as we become less dependent upon their members.

We Need More Good Bombers
I am no army or navy expert, but I am a statistician. When my Washington friends tell me that one of our bombs will wipe out 50 German buildings, I can reach an important conclusion. For instance, we know how many buildings there are in Germany which if bombed would cause Germans to surrender. By simple division we know, therefore, how many bombs would be necessary to complete this job and hence how many bombers would be required to make a slaughtering invasion unnecessary at this time.

My Washington friends tell me that we must be prepared to lose from three to five per cent of our bombers on each successful raid. Hence, it is only a question of making enough bombers and bombs. This we can do. If this would require dropping 300,000 tons in six months it would mean dropping 50,000 tons a month. If we must lose a plane for every fifty tons dropped, this would mean a loss of about 6,000 bombers and perhaps 60,000 men in the process of wiping out Germany. To a statistician, it seems a crime to lose the lives of 11,000,000 good Americans in too hasty invasion attempts.

Conclusion
When my associates read this copy they say, "The above four facts are self-evident; but what is needed to bring these changes about?" Well, unfortunately, they cannot be brought about by legislation and I fear education of itself will be unsuccessful. These four great needs require voluntary willingness to sacrifice on the part of all of us for the common good. Only a spiritual awakening can bring this condition about. Hence only a spiritual awakening can save America.

Memories of the Glorious Fourth

Hello Folks:

In the ole days we used to set down under the shade of a brush arbor in the edge of our town or some other town and we heard some orator with a big stiff bosom white shirt orate with his limber tongue and tell us all about the ole patriots who fought, bled and died that we might have the privilege of exploding "five cent package firecrackers" made over in China and he generally told us that if China ever got her freedom and got able to add three inches to all their shirt-tails we would get rich in the cotton business! Now, here we are all to busy to listen to any orators except Amos and Andy and Lum and Abner, for we are a fightin' to save the hole world and if we can win the war and finally persuade our own sweet wimmin to all put on their clothes we will get rich over night in the cotton business if we can persuade John Lewis to "keep his shirt on" and give the orders to work!

BARB WIRE BILL

RATION BOOK REMINDER

COFFEE—Stamp No. 22 valid from July 22 to August 11.

\$56.95 COMMON LABOR

BRASS FOUNDRY WAR PRODUCTION

58-HOUR WEEK

Need two men—able and willing to do a good day's work. Duties include shoveling sand into vibrating riddle, dumping out flasks of castings, cleaning casting, etc. Requires no skill. We work a 10-hour day and 8 hours on Saturday, quitting early enough on Saturday for you to get a haircut.

PAY FOR 58 HOURS FIGURES \$56.95

If you're not now working in an essential industry and are looking for a good place to work, come over and see our Mr. Freeman. Our plant is light and airy and is one of cleanest foundries in Northwest. Centrally located, there is plenty of room to park, so that it is only 30 seconds from your car to your job.

ONLY MEN WHO WANT A STEADY JOB ARE SELECTED

Your application cannot be considered if you are now employed in essential industry. If you are doing war work, stay where you are. If you have worked a half dozen places during the past year don't apply. We want to get to know our employees.
