## Drive Started For Clothing

Churches of Washington county will serve as collection depots in the salvage drive for discarded clothing and rags which will get under way Monday and continue through Dec. 4, according to plans announced Monday night by J. T. Covaly, county salvage chairman. Donations of discarded clothing are urgently needed to help clothe and rehabilitate peoples in liberated countries abroad and for relief purposes in the United States while rags are critically needed for wiping cloths by the armed forces and war industries.

Bundles of clothing are to be taken by the donors to the nearest church since shortage of gasoline, tires and manpower makes it impossible to conduct a house-to-house canvass in the campaign. All woolen goods must be brushed and all cotton and rayon garments must be clean enough to wear. Mending is not required.

Any clothing which the owner knows will be used now or in the immediate future should not be donated in this campaign. Churches all over the country are co-operating in the discarded clothing drive by serving as collection depots assisting in segregating the articles and announcements of the campaign will be made in the theatres, Kovaly said.

Mr. and Mrs. Lee Richey attended the meeting of the planning group Monday evening in Hillsboro.

## More Donors Needed November 29

Pla that volunteers meet their appointments at the Washington county blood donor center promptly or give sufficient notification to permit obtaining a substitute was issued this week by Mrs. F. Abendroth of Hillsboro, county Red Cross blood bank chairman.

One of the visits of the mobile unit to the county was dropped this month due to failure to meet the required quotas last month. Mrs. Abendroth explained. There is a waiting list of counties and communities wanting the mobile unit and unless Washington county meets its quota of 140 pints of blood on each visit, there is a possibility that the second day each month may be lost permanently. Next blood donor day in Hillsboro will be November 29 and all volunteers having appointments that day are urged to be on hand to assure filling the quota.

## How is Girl Scouting Organized

The demand for the Girl Scout program originates with the girl herself and is voiced by some adult who knows what the girl wants. Already sixty Beaverton girls have wished to join the Girl Scout Troop.

Youngsters need help, guidance, normal fun and recreation to grow up straight and true during war years. They must have training and experience.

Where can they find it? How can we as adults help them? Can we run the risk of neglecting the very thing this country is fighting for—the children and their future?

The Girl Scout organization in your community offers girls from seven to 18 a way of life that develops in them self-reliance, resourcefulness, and initiative—qualities always necessary for good citizenship that will become increasingly important in the new world order that these girls must face and help to create. Mothers, teachers and friends volunteer to lead a Girl Scout Troop in Washington County.

## 4 in 1 War Club Organized

The American Legion in Oregon, in cooperation with the Office of Price Administration, has launched a mileage conservation program as one of its major undertakings of the year, according to announcement by W. W. Fordyce of Portland, State Chairman.

Organized in the form of a "4 in 1 War Club", the Legion's program emphasizes the importance of car-sharing among motorists in order to conserve gasoline, rubber and motor vehicles "until victory is won."

To assist the public in forming ride-sharing arrangements, it is contemplated that transportation desks shall be conducted by local war price and rationing boards, under the jurisdiction of The American Legion and American Legion Auxiliary, thus providing a clearing house where motorists can share their vehicles with others. Through these facilities persons desiring rides and motorists desiring passengers, can file their requests and be matched up.

Ten gallons of gas saved in your own town is just as important as ten gallons saved elsewhere." Chairman Fordyce pointed out in his announcement sent to local posts of the Legion throughout Oregon. "When ration units were cut from four to three gallons, the needs of the Army and Navy in the fast developing theatre of war were greater than the supply."

Participants in the "4 in 1 Club" are pledged to use their cars for necessary driving only,—to observe the 35 mile an hour speed limit,—to keep tires properly inflated and avoid abuse of tires,—to be at work every day and to give as much energy to that work as possible, and to place patriotism and respect for fighting fellow Americans above individual interests.

## Leaving Money In Trust

New York City, Nov. 19—First let me speak a good word for the trust companies and other banks which are taking care of trust funds. So far as the law permits they are doing a good job. Many more parents and grandparents should establish trust funds for those who are to follow. "Shrouds do not have pockets." To die without a will is a calamity. Leave your children something outright; but also be sure to put something in trust for them. Do it today.

## Bonds May Become a Curiosity

People fail to realize how the market is being cleaned up of good bond issues. Outstanding bond issues are being redeemed or reduced rapidly and very few new bond issues are being put out. This accounts for the rapid increase in prices of preferred stocks, while common stocks are remaining stagnant. Trustees are being forced to buy stocks or else government bonds for their beneficiaries. Certainly there is no sense of paying banks to invest in government bonds! A few wise trustees are hedging by buying investment trust securities.
