WHY NOT? If the gals can shed most of their clothes in the summer, wear no stockings, and dresses cut to the waist, why should men suffer. They shouldn't, according to Dr. Victor G. Heiser, who not only advises them to shed their coats for the summer, but goes so far as to crusade for short-sleeved, open-necked skirts—and no neckties.

"You live only minute by minute through the routine that carries you smoothly, as if drifting down a river, toward the day of battle." Raymond Clapper's last column before his death in the Marshalls.

**Babson Says . . .**

Continued from Page 1

posals of government-owned plants and surplus government stocks of goods and commodities. The Baruch-Hancock report emphasizes the necessity for early government action on all postwar plans. Wise employers, however, will not wait for the Government to act.

**Outlook for Labor**  
 The great single problem threatening American prosperity is labor. Manufacturers are already being obliged to drop many employees. By the end of the third quarter we may experience a labor surplus. At the end of the War there may be 10,000,000 war workers unemployed. While we will naturally keep a large standing Army and Navy, there may be another 10,000,000 demobilized Service Men, making a total of 20,000,000.

If business is unable to maintain a fairly full rate of employment in the postwar era, aside from the normal floating supply of unemployed which might total 3,000,000 or 4,000,000, we are apt to face serious difficulties. Repairs to war-torn Russia, England, France, North Africa and other countries will readily absorb labor there. If, for example, Russia is able to have full employment after the War and the United States is not, what will our workers think? Such a situation could be the end of labor unions and their leaders would be among the unemployed.

Many individual workers already see the handwriting on the wall and are quietly trying to get more permanent positions. Organized labor is exerting great political pressure to

prevent the shutting down of many plants regardless of the fact that war requirements may already be filled. Certainly, there will be little aircraft or shipbuilding construction after the War. However, chemicals, building, automobiles and iron and steel should be active. These industries will employ many millions. Many others will be employed in road building and in the construction of public works. Nevertheless, the matter of postwar employment may prove a serious matter.

**Political Outlook Bullish**  
 The ramification of current business problems and those of the immediate postwar period are so many I cannot emphasize too strongly the need for efficient research and planning departments. Managements should give attention first, to broad plans and secondly, to the details of their companies' activities following the end of the War. From the standpoint of business, the political situation is now more hopeful than it has been for years. The Dewey-Bricker ticket is a definite "go ahead" signal—win or lose.

If we have sound government policies and a greater degree of co-operation between government and business and more co-operation between management and labor, we should have some good postwar years. Short-sighted businessmen and merchants will continue to fail—as they always have failed—regardless of years and regardless of periods of prosperity and periods of depression. Real workers, whether in the executive, white collar or union groups—will be able to take care of themselves.

**Quick Acting Brakes**

A new magnetic brake, which will stop a one-eighth horse-power motor travelling at 16,000 revolutions per minute in less than six turns has been developed by Chester I. Hall, General Electric engineer. Stopping the motor in six turns is comparable to bringing an automobile traveling at 62 miles an hour to a dead stop in 2.73 feet.

**HONESTY PAYS**

One of two women riding on a bus suddenly realized she hadn't paid her fare. "I got right up and pay it," she declared. "Why bother?" her friend replied. "I've found that honesty always pays," the other said, virtuously, and went up front to pay the driver. "See, I told you honesty always pays!" she said, when she returned. "I handed the driver a quarter and he gave me change for fifty cents."

**The proudest title in the Army**

IT CONSISTS of two simple words.  
 Yet every soldier who's worth his salt covets it.  
 This title is simply:  
 "Good Soldier."

It isn't just happenstance that so many women in the WAC have earned this title—the proudest in the Army.

For wherever Wacs are working, both here and overseas, there you find a job well done. And done with a spirit so gallant and fine that high Army officers everywhere say of the WAC...  
 "They're soldiers. Good soldiers!"

**Good soldiers...
