Chairmen Announced for Oregon War Chest Drive

Appointment of William Stratton as chairman of the Beaverton area for the Oregon War Chest drive opening October 2, was announced this week by T. H. Bailey of Hillsboro, Washington county chairman. The Beaverton area has been assigned a quota of \$3,000.

Community chairmen in the Beaverton area are now being named and an organization meeting will be called shortly by Stratton.

School districts in the Beaverton area include Hiteon, Garden Home, McKay, Beaverton, Barnes, Tualatin View, Cedar Mills, Bonny Slope and Union.

Mailing Food For Overseas?

Tin cans for mailing foods for overseas Christmas gifts may be obtained and sealed in the County Home Demonstrations Agent's office in Hillsboro, according to Cecilia Van Winkle, emergency assistant. These cans will be labeled with a department of agriculture sticker and in this way go overseas without being opened by the examiner.

Tin cans or tin boxes are the only type of container which give assurance of reasonable success in mailing food overseas. Long delays sometimes render even food in tin partly or wholly inedible.

Jams, jelly, preserves and any food that contains liquids cannot be sealed in the agent's office because of inability to sterilize cans and process food in the office. Anything containing liquid should not be sent overseas.

Blue Tokens, Farewell

If you have some blue tokens in your purse, better use them now, because after September 30 they will be good only for the kids to play with. Until next Sunday, the Office of Price Administration says, you can use them just as you always have used them. Beginning Sunday, Sept. 17, retailers ceased giving blue tokens to consumers as ration change, and shoppers will be able to spend them only in groups of 10. If necessary shoppers may pool tokens to make up groups of 10. Removal of practically all canned and bottled vegetables and fruit spreads and specialties from rationing Sept. 17 makes use of blue tokens unnecessary. Beginning Sept. 17 point values on canned fruits, canned juices, canned tomatoes, catsup and chili sauce will be designated in multiples of 10.

Time Short on A Book Renewals

Only a few days remain for motorists who have not yet applied for renewals of their "A" gasoline books to do so, OPA has warned.

All applications must be accompanied by the signed back cover of the present A book and the tire inspection record. Applications must be mailed to local boards and coupons in turn will be mailed back. No new books will be handed out over the counter.

Current A 12 coupons expire on Sept. 21 and the new A13 becomes valid Sept. 22.

Spare Ribs Point Free

"To market-to market-to buy a fat pig" and if you treat Mr. America to juicy, meaty spare-ribs your red points won't suffer any loss. Spare ribs are just one of the many point free cuts of meat—and what better Sunday dinner could you imagine than spare-ribs, baked sweet potatoes, and corn bread? No points—low cost—the housewife's dream.

Stranger Than Fiction

The American Red Cross received a cable with 21 separate addresses and 21 separate signatures, but only one message. It read:

"Am prisoner of war. Am well. Hope baby arrives okay."

Discovering they were all to become fathers at about the same time, 21 newly captured American fighting men in a German prison camp took advantage of the only means of calling their wives, through the Red Cross, when an International Red Cross Committee delegate visited the camp. He sent the cable for the men.

Half of the nation's commercial forest is second growth timber, re-grown on cutover lands. Future harvests will come from third and fourth growth timber, as the present trend to sustained yield logging increases.

A nice supply of both fiction and non fiction is there for winter reading. Readers are urged to give their preference for books so that the library can have diversified reading to suit all patrons.

Talking About Spuds—

Did you know that—Irish potatoes stored in light will turn green and taste bitter? They will turn into sugar and taste sweet if left at temperatures below 40 degrees Fahrenheit? They will spoil if frozen? They should be stored in a cool, dark place where the temperature does not rise above 60 or below 40 degrees.

Investment Trusts

Babson Advises Against Switches

Babson Park, Mass. Sept. 22—Investment trusts are useful for small investors. After one buys a home and some life insurance and has a small savings account, I now advise him to divide the balance between War Bonds (Series "E") and some good investment trust stocks. When one has his first \$500 to put into securities, it is very necessary to get diversified. It is considerable of a bother to divide \$500 up among ten stocks; but one can get the same results by putting \$500 into a good investment trust stock.

Advantages

Investment trust stocks, like everything else in this world, have their advantages and their disadvantages. In addition to their advantage of diversification already outlined, there is the advantage of supervision. Every investment trust has a manager who takes considerable pride in securing for his trust the highest possible rate of interest combined with fair safety. I like those without any preferred or bond issues so that you will have a first lien on the assets.

Although these managers make mistakes at times, yet you should feel much better off in having your holdings watched in this way. Otherwise, you should employ a personal investment advisor. Stocks and bonds cannot be put away in a safe deposit box and forgotten any more than can eggs, fruit, or even clothing. Remember what the Bible says about "where moth and rust doth corrupt and thieves break through and steal."

The S. E. C. is Helpful

Many bankers and corporation officials like to throw mud at the Securities and Exchange Commission who at times are very slow and provoking. On the other hand, I am certain that they are honest and that
