Federal Funds Allocated

Word has just been received from the Federal Works Agency allocating \$30,000.00 for the construction of five additional rooms to the Beaverton Grade School building.

In order to qualify for the Federal assistance, it is necessary for the local district to provide additional funds for the purpose of constructing and equipping the five classrooms, plus any additional space necessary to provide facilities for the four hundred and fifty five students now attending the Beaverton Elementary school.

Notice of a bond election for the purpose of providing the local district with funds required appears in this issue of the "Beaverton Enterprise." The bond election will be held on Monday, October 30, 1944, between the hours of 2 o'clock p. m. and 7 o'clock p. m. in the Beaverton Grade School Auditorium.

The present grade school building was constructed under a public works grant in 1937 and at that time it was believed that it would take care of the elementary school needs for a period of years, but due to the growth and development in this community, it has been necessary to convert the shower rooms under the gymnasium into small classrooms, the store room attached to the south end of the play room also has been made into a sub-standard class room. A room has been made of the store room above the stage in the school auditorium and three additional rooms were secured by dividing the cafeteria and first grade room.

The new addition will be constructed of hollow tile faced with brick and will match the old structure, but the new section will be constructed and equipped to provide modern space for primary work. A new boiler, wiring, toilet facilities and health rooms will be included in the new annex which will be an extension of the southwest wing of the existing school. Two of the five new classrooms will be oversized and separated by a temporary partition for conversion into a cafeteria after the war.

The bonded indebtedness of the school district at the present time amounts to \$15,000.00 to be retired \$5,000.00 on December 1, 1944, \$5,000.00 on December 1, 1945 and the balance of \$5,000.00 in December 1946. The new bond issue when approved by legal voters of the school district will start to mature at the rate of \$5,000.00 each year following the payment of the old issue in 1946 and will be retired at the rate of \$5,000.00 each year until paid. This plan will make it unnecessary to increase the tax rate due to debt service.

The elementary school building is open at all times during the school day for your inspection and you are invited to visit the building and determine at first hand the need for additional space to properly educate the children of this community.

In Beaverton Parent Teachers' associations have arranged a program for their next meeting to be held at 8 o'clock p. m. in the Beaverton Grade School auditorium on October 24, 1944, at which time the school district board will discuss the proposed construction program and bond issue. All interested citizens are invited to attend this meeting.

Up the Burma Road Go the Yanks

Here are some of our boys moving up the newly opened Burma road on their way to show the Nips what it's like to be up against the American Army. The Germans have already found out and now it's the Japs' turn to learn the hard way. Lend your dollars to Uncle Sam by buying more War Bonds so that the war in the Far East may be over that much sooner.

Dugdale Nut Drier Now Ready

The Dugdale Nut Drier at Cornelius is now ready to receive nuts to dry.

R. E. Dugdale has announced that he has installed a new type of drier—sacked nuts are dried with gas—a big improvement over the old method. This drier has a capacity of over 25 tons at one time.

The first floor is 80 by 150 feet and the second floor 30x135 feet. The second floor will ultimately be used for processing and cracking nuts. It is also planned in the near future to buy the hulls to be used in the manufacture of some useful product.

300 Attend Hi Recreation Night

The first Hi recreation night held October 6 at the High School was well received and attended by 300 students and friends.

The Beaverton Parent-Teacher members who prepared the refreshments and assisted the Hi-Y and Girl Reserves were Mr. and Mrs. N. P. Peck, Mr. and Mrs. Russell Grant, Mr. and Mrs. Graydon Pace, Mrs. Newt, Mrs. Tibogge, Mrs. Allyn, Mrs. Goldfinger and Rev. Sturtevant. There is a definite need for more games and card tables on which to play the games. If you have games or tables to lend please do so and bring them to the next Hi Night, which will be held October 13.

This is a community project, so let us have the help and support of every civic organization.

Plans are underway to carry on the recreation Night after each game played on the home field and with the help of the students and civic organizations there is no reason that Hi Night can not become a permanent part of our community.

Who Will Control The U. S.?

Babson Does Not Fear Labor

Babson Park, Mass., October 12—I may be making a mistake in my statistics. Of course, at best it is only an estimate. The figures, however, which I have collected indicate that five or ten years hence the majority of U. S. families will be receiving a pension check from the Federal Government. Furthermore, within twenty years the majority of the voters of this country may be receiving pensions. In his compilation I, of course include those receiving something from the Civil War, the Spanish War and World War I—as well as those who will have been in World War II.

What About Labor? The general feeling is that labor unions will control our Democracy. Businessmen and investors are especially fearful of the power of labor. This does not worry me for two reasons—first because the history of labor movements in England shows that after labor gets everything organized it has nothing to fight for without cutting its own throat. Therefore, labor then on longer becomes a front-page news item, while the labor leaders find they can make more money at some other line of work.

The second reason why I am not worried about the power of labor is because, in the last analysis, labor is a commodity whether we like to admit it or not. My friend Sidney Hillman will not agree with me on this point; but he is wrong. Labor today, is powerful because labor is scarce; but later, when the supply of labor exceeds the demand, labor's power
