Meet Mr. Showoff

Mr. Showoff sounded a trumpet and the crowd came up to admire as he counted out the tenth of all his gain and poured it into the treasury of the Lord. Mr. Showoff, by his trumpet, wanted all to know what a great and good man he must be in the sight of God.

Now look at that despised tax gatherer over there. He will not so much as lift up his eyes to heaven but he beats upon his breast crying—God be merciful to me a sinner. "I tell you this man went down to his house justified, rather than the other," said Jesus. JUSTIFIED—Set right in God's eye.

ONE—From the PENALTY—The justified are saved from the penalty of sin. God put the sins of your lifetime on Christ—"The Lord hath laid on Him the iniquity of us all."—BIBLE. Take forgiveness on the ground that Christ paid the penalty.

TWO—From the POWER—Up from the grave Christ arose to indwell all who receive Him as Lord and Saviour. As the redeemed yield their lives over to Him, they live by Power From on High. Christ becomes their sustaining strength.

THREE—From the PRESENCE of sin. On Judgment Day, the lost face the sins of all their days and go out into eternal woe. For the saved—In the ages to come God is to show the amazing riches of his grace, in his goodness to them through Christ Jesus. They go forever from the presence and sorrow of sin.

The Low Down From Hickory Grove

Some time back I was expounding on taxes, and poppin' off about what happened when Seattle took over the street cars and how, as soon as it did same, less Federal tax money trickled through to Uncle Sam. And to take up the slack, the Govt. upped the taxes on everybody throughout the Nation, including the Seattle citizens. And if you lived in Omaha or El Paso, I said, you get nicked, so it was not just a joke on Seattle.

So a fellow in Philadelphia wrote me via the Honey Grove Herald. A nice fellow, I think—he kept his temper and wrote nice. Anything lost in taxes, he said, could be made up to the citizens in lower rates, if its publicly owned plant was operated efficiently. IF, he said. But he didn't say how the citizens in El Paso or Omaha and elsewhere throughout the Nation were to go about getting their tax money back, due to any operating efficiency or vice versa, in a Seattle plant. I am up a stump—I don't happen to live in Seattle—so I will give the Philadelphia gent 3 cheers if he will tell me what to do.

Yours with the low down
JO SERRA

Australia to Welcome Yanks in Civilian Life

CANBERRA, AUSTRALIA—Australian minister for the interior Sen. John Silver Collings recently announced all restrictive formalities will be waived to welcome American servicemen already here who wish to make permanent homes in Australia. Collings said many inquiries had been received from American servicemen about possibilities of settling on Australian land.

A general returning to camp one evening, couldn't produce his identification. The rookie on guard duty, unimpressed, refused to let him pass through the gates. Finally, the exasperated general bent forward, pointed to the stars on his shoulders, and bellowed: "Do you know what these mean?" "Sure," popped the rookie, "you got two sons in the service."—Wichita Press.

Surrounded by Nazis when he landed his glider on Cherbourg Peninsula, Capt. William Adams gave his captors such a convincing argument that they surrendered to him and two infantrymen—Bag totaled 165 prisoners.

Ribbons of Wire...

VITAL ARTERIES OF VICTORY

NO doubt you have driven along hundreds of miles of Oregon highways, never noticing the tiny, ribbon-like wires that stretch in an endless belt from one city to another.

These copper colored, ribbon-like wires, suspended from cross arms of poles are the life blood of our war effort. For through these pathways of power flow 115,000 volts of man-made lightning—115,000 volts of war power to feed 67,000 war jobs and 20,000 war farms.

The picture shown at the right would not be very impressive unless you knew the really vital job it has already done in its short life. For instance, a vessel maneuvering in the river a short time ago snagged its anchor on the sub-marine cables from the St. Johns Sub-station, which feeds vital war plants, rolling mills, lumber mills, and blast furnaces.

The sub-marine cable was a total loss. But this new line, shown in the picture, not yet complete and coming from PGE Station E, was hurried into service so that only a very few hours of valuable war work were lost. Without this line, days, perhaps even weeks would have been required to restore warpower to these critical plants.

Once again, PGE "know-how" and experience came to the front to produce for victory. 115,000 volts of electrical energy... warpower... was at the disposal of industries producing for victory. It takes "Know-how"... "Know-how" takes experience... PGE has both.

Portland General Electric Company

for 1/2 century, pioneering in electrical "know-how"
