A Little Christmas Cheer

These times are strenuous, everybody is so busy working every day—It will soon be Christmas! We are thinking of two persons who live alone in this vicinity—they are invalids and have to move about in wheel chairs day by day and have a hard time to keep warm and get enough to eat on these chilly winter days—and do not have many visitors to see them. One is Mrs. George Newman, Cedar St., Beaverton, and the other is Miss Jeanie Barry, route 2, box 79, 1/2 mile East of Beaverton, Canyon Highway. Wouldn't it be fine to bring a "Little Christmas Cheer" to these two persons this Christmas—they will be glad to see you.

Many Districts Go Over Top

Several school districts in the Beaverton area went over the top in the Sixth War Bond Drive. They are as follows:
Union District No. 6—Mrs. Gredvig, chairman.
McKay District No. 18—Ina Erickson chairman.
Sylvan and Bentz Park No. 104—Rev. J. Fritz, chairman.
Cooper Mt. No. 94—Mrs. A. T. Caviness chairman.
Aloha, No. 107—Mrs. Marian Klatt, chairman.
Hazeldale No. 60—Mrs. W. P. Brook, chairman.

These chairmen are to be congratulated on work well done. E bond sales are still lagging behind in Washington county but the time has been extended to January 1, 1945, in hopes that the quota will be met or exceeded.

Celebrates Birthday in Old Home Town

It seems good to come back to the old home town once in a while. A long time ago a boy lived with his folks in South Beaverton, he liked to hunt for quail, go fishing for craw dads on Fanno Creek was fun—and did not always stay home on Halloween. He was a good scholar in the Beaverton school, attended the Debating Society at Grange Hall on Saturday nights and sang baritone in the old Owl Quartette—this fellow's name was Floyd W. Allen—he now resides at Cornelius and works in the shipyard. Three of his sons are in the U. S. Service.

On his recent birthday, he visited at the home of his sister Della C. Flaher of this place, and enjoyed singing some of the old quartette numbers.

The division first saw action when it went to Guadalcanal in the fall of 1942 to reinforce the First Marine Division there. For their part in this action, Lt. Business Brains

Babson Discusses Our Public Schools

Babson Park, Mass., Dec. 22—Brains—not wealth or military power—are the basis of national progress, including physical and spiritual as well as mental.

Employment and Federal Debt
This country's postwar employment problem is really up to our educators. If there is much unemployment after the War, it will be because our nation's school committees have not properly backed their school superintendents and teachers. Whether or not \$300 Billions of government bonds are to be paid, refunded or repudiated, will depend upon the attitude of the young people now in our public schools. Hence, the future of our huge Federal Debt depends upon our local school committees.

It is true that these educators like to pass the buck to us parents. Without doubt the homes are not doing their part toward a better America. We parents, however, are not brain specialists and are no more responsible for the city's educational plant than for its water, light and sewage system. The education of our children is the responsibility of our school committees.

Who are Your School Committee?
The human brain is the most delicate, most complicated and most wonderful machine in existence. The future of every community depends fundamentally not upon its banks, buildings, streets, utilities, factories, or stores. These are but tools. The future depends upon the brains of its young people—little masses of "inscrutable jelly" weighing about 40 ounces per child. Remember that our physical and spiritual condition is also a reaction of these brains. Yet, today most brain specialists are giving all their time to the insane and those having fractured skulls, brain tumors, etc., rather than to normal people.

But who—in your community—directs the development of these most delicate, intricate and marvelous machines. The answer usually is "shopkeepers, and second-grade lawyers, carpenters or plumbers." Really, this situation is absolutely ridiculous. Very few school committees have a trained physiologist on their boards! In short, the trouble with most communities is that they have put the development of brains into the hands of men and women who are absolutely unfitted for the task. Most of them are using the school committee as a springboard for their personal political ambitions.

What is Education?
Education is the development of the brain which determines whether we think rightly or wrongly about everything! If a person neglects his health or judgment, something is the matter with his brain. If he fails to recognize the Fatherhood of God and the Brotherhood of Man, something is the matter with his brain. If parents are not properly bringing up their children, something is the matter with the brains of these parents. Juvenile delinquency is merely a symptom of brain delinquency. Everything good and bad, in your community is the result of its brains.

The relation between brains and employment is 100%. The only way to help these unemployed permanently is to develop their brains. This can be done; but not by putting them "on relief" or by giving them an "education." But this is only one feature of the unemployment problem. It is far more important to develop the brains of prospective employers and labor leaders. Too many employers hold power—not due to their brains—but because they have inherited the business from some grandfather. In fact, Mrs. Babson and I feel so strongly about this that we have given \$3,000,000 to two educational institutions to help parents who are truly interested in this problem.

Memories vs Brains
Most school superintendents know the truth of what I am saying. They hate to give so many school hours to teaching more "typing" and other "practical" courses which the carpenters and plumbers on our school committees are demanding. This also applies to courses wherein students get high marks because they have inherited good memories which will have little to do with their future health, happiness or success.
