Woman Leaves \$20,000 to Dog, but Nothing to Son

DETROIT. — A dog named Jack will become heir to an estate valued at approximately \$20,000 and a son will get nothing if the will of Mrs. Margaret Myers is admitted to probate.

Mrs. Myers died last October at 72. The estate includes a home in Detroit, a winter home in Sebring, Fla., an automobile and several thousand dollars in life insurance.

Her will, read in court recently, stipulated that "I bequeath everything to my dog, Jack, and whoever takes care of him at my home shall have rent free." A neighbor, Herbert Kelly, was appointed Jack's custodian.

New Super Grease Made

Of Sand Is Discovered

NEW YORK. — Sand has been converted into a new kind of machinery grease in a discovery reported to the American Institute of Electrical Engineers here.

This grease does not harden at 70 below zero and does not melt at 400 above. There has never been a grease or oil like it.

The sand grease is one of the new silicones, an entirely new class of industrial materials. All are based on introducing sand chemically treated, and made to form a synthetic resin.

Aid To Veterans

Babson Discusses G. I. Loans and Education

Babson Park, Fla., March 16—I am astonished by figures just released. These show that over 3,600,000 draftees have been turned down because of poor physical condition and over 1,900,000 discharged; while the average intelligence of the entire army equals only that of a 13 year old boy.

Loans and Education
Yet politicians pretend that this situation can be remedied by loaning each returning soldier from \$2,000 to \$10,000 or by giving him \$500 per year plus \$50 per month to get some kind of a diploma. I am glad to have veterans receive these gifts; but they must not think the loan or the diploma will enable them to operate a business successfully or even to hold a good job.

It would be far better for the government to help these men develop self-mastery and constructive thinking;—to use themselves as a laboratory instead of bothering with some college laboratory. The truth is that their brains have been in a concentration camp for the past few years. The veteran's future depends upon the use of their brains, in hard constructive thinking under expert guidance.

Your Boys' Brains
Without doubt the United States will enjoy a few years of "prosperity" following World War II. Certainly, this will last until the people spend the money which—since 1940—they have been accumulating. As to what will happen thereafter will depend upon the thinking powers of the returning soldiers. G. I. loans and free education will not keep people employed. In fact, why should any man expect any other man to employ him? Why should not all have initiative and originality enough to create their own jobs?

The answer to the above question is that very few people have been taught to do original and constructive thinking. This is a basic cause of unemployment and one which must be rectified. Here are matters of great importance to every parent: Has your boy a definite goal in life? Has he self-control and self-mastery? Has he imagination, energy and stick-to-it-iveness? Has he been "born again" spiritually? Is he returning from the war more or less thoughtful—with better habits? The answer to these questions by honest mothers will determine whether the United States' debts will be paid or repudiated as well as our postwar employment situation.

Great Discoveries Ahead
At the Adult Conferences to be held at the Babson Institute in April and May, these questions will frankly be discussed. Parents will then be given definite help by experts. The

first step is to realize that body, mind, and soul are one, and that a truly spiritual rebirth is the most effective foundation for a useful, healthy and happy life. But those attending these Courses will learn of other methods of stimulating men which have untold and unlimited possibilities.

The future of your boys after the war will not depend upon money or college diplomas but upon self-mastery and brains. Neither of these needed assets is secured by reading books or by listening to the radio. They will come only through self-development, hard thinking and bitter experience unless some entirely new methods are discovered. Personally I believe such discoveries will take place. Hence, I am optimistic as to the future. There should be hundreds of thousands of Edisons, Einsteins and Fords!

Encourage Employers
Heretofore, brain surgeons and psychiatrists have worked only with the insane or those who are broken-down nervously. In the new era following World War II, I believe they will work with normal boys to stimulate their thinking and personal powers. You see immediately that this has tremendous possibilities and could completely revolutionize educational methods as well as religious work. We will have more and better employers.

Let every reader encourage the employers which are now carrying the burdens of the war and are preparing for the new tasks of the peace years ahead.
