BOOST YOUR HOME TOWN

Reams of copy have been written on this subject, but with it all there is still considerable time that could be spent on reflection by each resident of his home town on what he could do to make the town a better place in which to live.

Did you ever stop to think that your home town is "you"?

And it is your home town because you live there?

Most of us came from some other place in the country. We couldn't all have been blessed with having this as our birthplace. However we are here now and thus it is now ours to BOOST and BUILD.

We have a wonderful opportunity to get in and work with those who have been bearing the brunt of the responsibility of our town in its management and promotion. Each one of us should be a walking AD for the community where he lives to publicize its advantages and help seek a remedy for whatever might appear disadvantageous to him. We should be able to enjoy the knowledge of progress we have helped make possible with each passing year.

This is a program we can't wait until tomorrow to start. It concerns our daily living and NOW is the time to start.

Let's continue to be known as a "community of boosters".

A WET HAND vs. AN OBITUARY

We are reminded constantly thru all of the means of public communication that we must be mindful of our traffic hazards and do all that we can to reduce the terrible toll exacted each year thru avoidable accidents.

It seems to us that if the other fellow knew just what we intended doing before we accomplished our change of direction, or speed much could be done to accomplish this common purpose.

This could be achieved by the simple operation of rolling down the window and giving the proper hand signals to identify our next move to both those following as well as those approaching within short range.

In the winter time it is often distasteful for us to "stick out our hand" but we believe you will agree that a wet hand is more quickly dried than the tears of mourning.

Americans will see woodpecker planes with controllable wings, the position of which can be changed at will by the pilot. (This means greater safety, and easier handling by eliminating the need for ailerons, elevators and rudder.)

THE OLD JUDGE SAYS...

HARRY: "I don't know what they'll weigh up, Judge, but my cattle and poultry sure have been gettin' fatter since I started to use distillers' dried grains in their ration."

OLD JUDGE: "Have any trouble getting all you need?"

HARRY: "You're about the tenth one who has told me that, Harry. How do you account for it?"

HARRY: "The by-product recovered from grains used by distillers is very high in vitamin and protein content. It's the best feed supplement we can get to balance the rations we feed our dairy cows, livestock and poultry. Mixed with original grain, these distillers' dried grains have a much greater feeding value than the original grain has."

OLD JUDGE: "Then I guess nobody can tell you grain is wasted in distilling."

HARRY: "Not me, Judge... I know."
