Babson Discusses Russia

Washington, D. C., March 22. Let us start with three statements with which most intelligent people agree: 1. Notwithstanding Churchill's blast, no group NOW wants a war with Russia. Surely the vote of the United States would be 100% against it NOW, although we are better prepared for it NOW than we may ever be again.

2. Most of all, Russia does not want another war NOW. She knows that we saved her in World War II; and she knows she would lose all her gains with a World War III NOW. 3. Our State Department is so divided into Catholics, Protestants, New Dealers and Capitalists that it cannot agree upon any foreign policy NOW—to say nothing of agreeing to fight Russia NOW.

Hence, there is no possibility of a war with Russia for an indefinite period.

Is War III Probable?
It is safe to add a fourth forecast, viz.—If our recent daily-dilly, contradictory, inconsistent and silly foreign policy continues long enough, we may have a war with Russia someday. Then, the U. S. and Britain will not be so well prepared as we are today; while Russia could then be very much stronger and in addition will have all atomic bomb secrets. Only a spiritual awakening of our State Department, or a splitup of Russia into two or more nations, can prevent such a conflict.

Conditions today are almost identical with those following World War I. Instead of a German Hitler, there can soon develop a Russian Hitler. Great Britain again has a Labor Government; France again is playing politics and talking pacificism; while U. S. mothers merely "wanna get their dear boys home." World War II would have been unnecessary had it been "nipped in the bud." World War III can be prevented by the U. S. and Great Britain NOW joining on a fair, but firm, foreign policy, backed up by force.

What This Means To Business and Investors
Hence, businessmen and investors have nothing NOW to fear from Russia. For the past year, I have been forecasting a break in the stock market "due to a Russian scare." This recently occurred when stocks lost billions of dollars in a few days. Now this is probably over and we should go merrily along for awhile with better business and higher stock prices.

This present Russian scare should make Congress more willing to appropriate funds for national defense, cause it to help the British Empire and to encourage that Empire to do more for her Colonies. The best way to combat Communism is for Capitalism to insure a higher-standard-of-living and greater security than does Communism. The new Atomic Energy may succeed in doing this. I feel as President Truman and Mr. Churchill agreed at Fulton, Missouri, on March sixth: "These are perilous times. The world either is headed for destruction or for the greatest age of progress in history." If we are to have the latter, this is a time to hold good stocks; while if we are to witness destruction, then it will make no difference whether we have cash, stocks or government bonds!

Nationalists vs. Internationalists
Our people, unfortunately, are divided into either Isolationists or Non-Isolationists. One group thinks we should be content to put our own house in order before mixing up with the rest of the world. The other group goes to the opposite extreme and thinks that through the United Nations Organization we can NOW run the world and give every nation the Four Freedoms. Both of the above groups are wrong. Either group could get us into trouble. President Truman should clear out our present State Department and substitute therefor a united Department with a middle-ground, but firm, policy. This policy should be "limited inter-nationalism". It should be free from politics, prejudice and philanthropy. It should have one aim; namely, to interfere only in those spots which are liable to get us into war if left to smolder.

Believe In The U. N. O.
I believe in the United Nations Organization and hope it will succeed, but democracy is too young a child to NOW depend upon it, exclusively. But important Foreign Notes should be issued only when approved by Congress—in advance—coupled with a willingness to declare war if said Notes are ignored. Otherwise, we should mind our own business.

SCHOOL ROOM PRAYER

"I read the Bible and make a prayer each day as school opens and out of it we have definite good." So said the teacher of the one-room country school. Yes, says the Lord—"Them that honor me I will honor and they that despise me shall be lightly esteemed."—BIBLE.

Now turn to New Guinea, S. Pacific where the kiddies in the public schools are taught to read out of the Bible as text book. Quite right, for the Bible lifted their fathers out of cannibalism. Step in and listen as they read how Christ set forth God's love for the common people. Yes, the common people who have ever lived under rags, disease and superstition. The kiddies read how Christ made the blind to see, the lame to walk and of how He raised the dead back to life. Now follow on to the great day when He bowed His holy head in death to clear such of us as accept Him as Lord and Saviour. And in this America of broken homes, lust crime, profanity and drink, our kiddies also need to know how God would win them to himself. Get them up a bit earlier—gather them around—open to Luke 5:22-25 and read how Christ spoke a word and stilled the waves—Christ the Creator. So do and better days are on the way.

Vote City Water Expansion On Wed. Mch. 27

Approval of Beaverton's No. 1 expansion project will be the subject of a special election to be held at Beaverton City Hall on Wednesday, March 27. The polls will be open between the hours of 8:00 a. m. and 8:00 p. m., but may be closed for one hour between the hours of 12 noon and 2 p. m., at the discretion of the judges of the election.

Voters are asked to approve an issue of \$200,000.00 of water bonds the proceeds of which will be used as follows:

Retiring remainder of out standing Refunding Water Bonds	\$ 20,000.00
Pumping Equipment for New Sorrento Well	7,600.00
500,000-gallon reservoir at Sorrento Well	32,000.00
Transmission Line—Sorrento Well to City System	32,500.00
Replacing Transmission Line on Tualatin Valley Highway, necessitated by building of 4-lane hwy	35,500.00
Replacements in present System	72,400.00
TOTAL	\$200,000.00

The bonds are expected to bear approximately 1.75% interest which with the serially maturing bonds will be paid from water system net revenues, exclusively, according to a bond maturity schedule which has been prepared.

However, the payment of interest and principal is also guaranteed as a general obligation of the City which means that in case the water revenues should prove insufficient in any year to pay the interest and maturing bonds, the deficiency would be included in the General Fund Budget and paid from tax collections.

The inclusion of this general obligation feature results in a material saving in interest rate which would not be received without it.

The new source of water secured when the Sorrento Well produced 950 gallons per minute on test meets a serious need and must be made available for use as quickly as possible. The capacity of the present well is 310 gallons per minute.

A high rate of leakage and increasing maintenance costs, require replacement of much of our city distribution system consisting of wood-stave pipe lines which have passed their expectancy of life and usefulness. Much of this wood stave pipe is more than 30 years old.

All plans for construction are based on the report of John Cunningham and Associates, Consulting Engineers, and are designed to meet Beaverton's most pressing need in the most economical manner.

Detailed information may be obtained at the City Hall from R. C. Doty, Recorder-Treasurer.

All qualified voters are urged to go to the polls and vote on Wednesday, March 27, 1946, between 8 a. m. and 8 p. m.

Two More Logs Roll Off O-E Train

Last Saturday two more 40 foot saw logs rolled from a Portland-bound logging train on the O-E about 400 feet East of Cedar Street crossing, Beaverton. Luckily they missed the Highway crossing, a short distance, as many autos stop close to the track on both sides when logging trains pass—not realizing the great danger.
