"JOB DIVIDENDS" at General Electric

For the year 1945, \$35,000,000 in addition to wages
was spent by General Electric in extra
benefits for employees

It isn't a new thing for General Electric to put more than money into pay envelopes for its employees.

"Job dividends"—these extras that G-E employees get in addition to wages—have a sound business reason. To be successful, a company must be efficient. A man with fewer worries can produce more efficiently, which makes further benefits possible.

Profit-sharing plans, relief and loan plans began over 10 years ago at General Electric. Life insurance for em-

ployees, cash for suggestions began over 20 years ago. Pension plans were started 33 years ago. And vacations with pay began 53 years ago.

Every employee has a stake in the future of General Electric. For out of its success—and only out of success—can come further advances in living standards. That is the aim of General Electric, not alone for its employees, but for the public, who gain by new and better products, continuously improved.
