THE BOSS MAKES AN ANNOUNCEMENT

Here's the Proposition!

I'm speaking for all the babies in town. Ordinary milk caps are NOT good enough for us. Can't take chances on dust and germs getting in. We demand the very best protection for our milk.

THE GENTLEMAN IS RIGHT

... and we're meeting his demands with Dacro Protected Milk... the safest package of milk you can buy.

The bottle is not merely covered. It's SEALED with a sturdy metal cap... air-tight, dust-proof, tamper-proof. There's complete, scientific protection for our milk after it leaves the dairy. Let one of our route men show you what this protection means to you and your family.

Because the Dacro Cap is a genuine seal, it must be removed the first time with an opener. After that it may be snapped back on the bottle as a re-seal and removed again and again, even without an opener.
