Aloha-Huber School
During the past week, and in their spare time, the students prepared for their Halloween parties. Witches, pumpkins and corn stalks have found their way into the school rooms. The parties took place Thursday afternoon.

The hot lunch program is getting along fine. It is proving to be a help for the children on these cold and rainy days. Everyone cleans his plate.

For the past week, the students have been contributing to the Junior Red Cross campaign. Membership is 50 cents per room but every room has oversubscribed, and the students may well be pleased with the results.

At present all of the boys and girls are busy selling magazine subscriptions in order to help raise funds for school movies and extra activities. This campaign, which will probably bring many students to your doors, will continue for the next week. A certain percentage of the sales is to be contributed to the school fund. Prizes are also given by the publishing company to students selling a certain number of subscriptions.

A whole holiday is coming on Tuesday November 5, because the school will be used for a community polling place.

In order to use the facilities of the gymnasium, the boys and girls of the five upper grades are being divided into squads for playing purposes during the noon play period. The girls will have a volleyball tournament and the boys will play a basketball schedule.

Beaverton Girls Attending Walla Walla College
Phyllis Morford and Helen Litvin, junior students of Beaverton, enrolled at Walla Walla college this term to help swell the attendance at that institution far beyond any previous records there. The College Place school, fourth largest institution of learning in the state of Washington, is operated by Seventh-day Adventists and serves the church membership in the Northwest.

Latest enrollment figure released by the registrar, Mrs. Irene Black, was 1012. During the war and a few years preceding that date beginning enrollments were in the five and six hundreds. A record enrollment was insured this fall when nearly twelve hundred were granted tentative acceptance by the admissions committee.

Extra sections have been formed in numerous classes because of the exceptional enrollment, and other classes are bulging to capacity because no extra teacher is available in those fields. Six new teachers have been hired full-time and four others part-time, however, since school began, to bring the total to more than 24 new teachers added to care for overflow classes.

For the first time since the war decimated the ranks of the men at the college, the number of men enrolled has surpassed that of the women. The latest figures list 68 per cent of those who entered school this year as males, a sudden switch from war days when the women outnumbered the men at times four to one.
