and we're meeting his demands with Dacro Pro-
tected Milk... the safest package of milk you can buy.
The bottle is not merely covered. It's SEALED with a
sturdy metal cap... air-tight, dust-proof, tamper-
proof. There's complete, scientific protection for our
milk after it leaves the dairy. Let one of our route men
show you what this protection
means to you and your family.
Because the Dacro Cap is a genuine
seal, it must be removed the first time
with an opener. After that it may be
snapped back on the bottle as a re-seal
and removed again and again, even
without an opener.
