2 Years to Make 1/4 Million Cars
Kaiser-Frazer Corp. will pro-duce its 250,000th automobile next week, just two years after pro-duction started at the Willow Run plant with the manufacture of 7 automobiles in June of 1946, ac-cording to Jack Kelly, Beaverton dealer.
The quarter-millionth car, a Fra-zer Manhattan model, is scheduled for production on June 25. It will be the 93,741st car to be built by K-F in 1948, a figure which nearly doubles output attained in the first six months of last year.
Starting production in June, 1946, the new automobile company turned out 11,753 units in that year. Output jumped to 144,506 for 1947 when the company became the fourth largest producer of passenger cars.
K-F's scheduled output of 21,000 units this month represents a new monthly production peak in the history of the company. The previous high was 20,667 cars in January, when production was on a two-shift basis.
Currently, the Willow Run plant is producing more than 800 units per day on one shift and a nine-hour, six-day work week is being maintained.
