

Beaverton Decides About This August 25

REBEKAH POTLUCK
The Beaverton Rebekah Past Noble Grand Club met Thursday at the home of Mrs. Mabel Gilmore in Aloha. A pot luck lunch was initiated into the club. Christine Smith of Lebanon, President of the Oregon Rebekah Assembly, Mrs. Grace Christenson, Past President of the

Rebekah Assembly, Mrs. Nellie Allee of Portland and Mrs. Pearl Black of Aloha were guests. Mrs. Mae Lusk and Mrs. Leona Rands were initiated into the club. The ladies are making dish towels as their project for the year. Next meeting is to be at the home of Mrs. Adeline Frost.

REASON ENOUGH FOR CONDEMNATION proceedings against the City of Beaverton is its "storm sewer" behind the Highway Tire Service, in which fresh sewage as well as surplus water drainage is evident, according to the unofficial opinion of a state sanitarian.

The ditch parallel to the left side of the picture is screened by a heavy growth of weeds and brush. But the pollution is there, just the same. In the center, rear, a pool of sewage effluent had seeped to a low depression.

Facing the outfall of the city's "storm sewer" (not shown in the picture) are, left to right, Dr. L. Thompson, State Sanitarian C. M. Everts, Jr., County Sanitarian T. W. Christensen and Dr. C. E. Mason.

It will be up to the residents of Beaverton to decide at the polls, August 25, whether or not such a disgraceful evidence of pollution will long remain, to jeopardize the health of the entire community.

Beaverton Fire Chief Finishes Training Course

Fire Chief Archie Olson of the Beaverton Fire Department returned home this week from Corvallis, Oregon, where he was enrolled in the Fire Department Instructor's Course held on the Oregon State College campus. Chief Olson will become responsible for conducting a standard training program for the local fire department. The course is scheduled to get underway in the Beaverton Fire Department immediately after Fire Prevention Week which falls on October 3 through 9.

Chief Olson says there were representatives from 17 other Oregon communities at the school and that the group was given specialized training in teaching methods and in various fire fighting evolutions which included courses on the Chemistry of Fire taught by Captain Jack Lowe of the Portland Fire Department; Salvage Evolutions taught by Assistant Chief Charles Ransom of the Corvallis Fire Department; Ladder Evolutions, Hose Evolutions and Gas Masks by Captain Leo Weidner, Assistant Drill Master of the Portland Fire Department; and Fire Pumps by Earl Albright, former fire equipment installation engineer of the American La France-Foamite Corporation. All instruction offered at the course in Teaching and Teaching Tech-

niques was provided by Elmer Halstead of the State Department of Vocational Education of Salem.

These Instructor Courses are sponsored by the Oregon Fire Chief's Association and are supported by the Oregon Fire Fighters' Association, the League of Oregon Cities, the State Department of Vocational Education and the State Fire Marshal Department. Three such courses are offered under the program this year, the first being held at Oregon State College in Corvallis from July 25 through July 31; the second at Eastern Oregon College of Education at La Grande from August 1 through August 7; and the final course at the State Vocational School at Klamath Falls from August 15 through August 21.

Two such courses were offered in 1947 at Oregon State College and qualified thirty-five men from thirty-two departments which have since gone through the complete Basic Training Course. The three courses offered this year will qualify a total of forty-one more local instructors. It is planned to continue the program until all departments in the state are participating in the Standard Training Program. The object of the program is the development of standard training methods in each of the fire departments of the state aiming at an increase in the efficiency of the methods of fire fighting followed thereby bringing about a reduction in the losses of the state.

County Fair To Feature Special Hobby Division

A special division for hobbies of all types will again be a feature of the Washington county fair under auspices of Hillsboro Lions club. Competition for both seniors and juniors is again planned at "Hobby Hall," according to Wayne Emmott, chairman of the Lions committee in charge.

Photography will again be a feature with ribbons being presented for the best Washington county view, best landscape, best action, best group and best animal. The antique division is to include collections of relics and historical pieces figuring in the history of the county and general antiques of all types.

The junior department for boys or girls under 18 years of age or registered in grade or high school, will feature creative work-model airplanes, art and miscellaneous. It will include collections of all types besides the usual photography.

Emmott announced that D. M. McDade, supervisor of the Journal Juniors, will again judge the hobbies, making the rounds on the afternoon of September 1. Morris McEntee of Mac's Hobby Shop, Hillsboro, is to judge the model airplanes. All hobbies are to be protected from breakage or theft, Emmott said. Entries must be made to Mrs. W. H. McNay, route 5, Hillsboro before August 30. The hobbies should be brought to "Hobby Hall" on August 31 or mailed to Fair Manager Leon S. Davis prior to that date.

ON EVERY DAY

Earthquakes occur on the average of every 14 1/2 hours, a major earthquake every 6 1/2 days.

Oregon Centennial Theme Takes County Fair Sept. 3

PARADE OF PIONEER DAYS, PICNICS, SPECIAL EVENTS, EXHIBITS WILL MARK OBSERVANCE

Pioneers of Washington county will set the clock back Friday, September 3 when the county will celebrate the Oregon Centennial at the Washington county fair.

Old trucks, long since stored in attics, are being dusted off and

opened in the search for costumes of yesterday to be used in the parade and at the fair grounds during the day.

Plans for the observance of Centennial Day are progressing rapidly under the direction of Finis L. Brown of Laurel, with the assistance of members of the Washington County Pioneer association. Definite program for the observance will be completed at a meeting planned for this week.

Opening feature of the day is to be the Centennial parade on Friday morning which will feature pioneer costumes, transportation of yesterday and a section for commercial floats, automobiles, trucks and farm machinery.

At the fair grounds, there will be a picnic of the association with a special speaker followed by a special program of events in the stadium set up in the old ball park north of Shute auditorium. Included in this program will be vaudeville acts by professional talent, style revue of old time costumes, awarding of prizes for various events, an da number of old time contests to be announced later.

Another attraction to be presented by the association will be a display in the fair buildings of relics associated with pioneer life in Washington county. This display may take the form of a pioneer cabin completely furnished with the articles which made up the home comforts of the pioneer settlers.

September 1 has been set as final closing date for membership rolls for the 1948 crop by the board of directors of Northwest Nut Growers. The closing date was voted at a special meeting last week and applies to both filbert and walnut growers.

The board commended reports from local unit organizations of Northwest Nut Growers showing continuous and steady growth in membership during the present season and all recent years. Unit associations include the Amity-Gaston Nut Growers, Dundee Nut Growers, Eugene Fruit Growers (nut division), Lebanon Nut Growers, Oregon Nut Growers at Newberg, Salem Nut Growers and Washington Nut Growers at Vancouver.

Growth of member organizations and Northwest Nut Growers as a whole is attributed by the board to the development of a new long range marketing program.

A lot of lines are going to be busy in town when these prices are read. Housewives have to steer a precarious course between spending too much and not getting quality foods. Good prices and good foods often mean separate items. But **TOD'S FOOD CENTER** offers BOTH, as our customers know. **Prices Effective--Friday, Saturday, Sunday--Aug. 20-21-22**
