## WHO

West Slope Food Bank, long recognized as a model in the food locker and refrigeration industry, is owned and operated by Mr. C. F. Gestring of West Slope. He is a leading proponent of "Save food costs with a Locker." Through his knowledge and efficient operation, he has made available to the people of this area one of the finest services of its kind in the state.

Kain's Frosty Kitchen of Beaverton is owned and operated by F. M. Kain. His experience in frozen pastries during the past four years has gained for his plant recognition from Alaska to California for quality. Their fresh frozen specialties have been enjoyed by many in this district.

## WHY

The small home freezer in the kitchen fills a long felt 'gap' between full appreciation and use of storage lockers and the housewife's table. Each has its advantages, and together make an ideal arrangement for the home maker.

The modern storage locker, with facilities for caring for bulk purchases, by proper wrapping and quick freezing, insure the consumer of 'best possible flavor' storage and at a cost that simply cannot be equalled by any other method.

Many items do not lend themselves to bulk storage and require processing that is neither practical nor economical for the housewife or the locker operator to undertake. The unmatched convenience of a small freezer eliminates frequent trips to the locker plant, thus saves time and money.

Yes, here is the ideal appliance. The right temperature to keep all types of frozen foods at their best and right handy for easy preparation. You save all left-overs, and have many special items and uses that add up to genuine savings on the family budget. The cost of operation is so small and the original price so reasonable plus the unmatched savings we can show you through our refrigerated delivery service each week. . . Your freezer will be paid for in full in less than two years.
