Atomic Weapons Effect Subject Of Coming Book

A description of just what happens when an atomic bomb explodes will soon be available to the public in an official Government document now being printed at the Government Printing Office. Entitled "The Effects of Atomic Weapons," the book will be released about August 1, and advance orders may now be placed with the Superintendent of Documents, Washington 25, D. C., at \$1.25 per copy. All proceeds from the sale go to the Government.

Of primary interest to persons engaged in civilian defense and the building trades, the book contains previously unpublished details on atomic explosions. The damage caused by the atomic bombs in Japan is examined with estimates of the probable effects on American cities. The types of buildings which best withstand the shock and the hazards of various radiations are described and illustrated.

The book was prepared by the Atomic Energy Commission from non-confidential scientific and technical information. It is the most informative and authoritative book on atomic weapons which can be made public and is the most significant document to be published since the Smythe Report.
