

COMMUNITY CLUB ARRANGES TO GIVE KIDS HALLOWE'EN PARTY

By Mrs. Olive Irvin

ELMONICA-MCKINLEY—There will be a Halloween party at McKinley school on the night of October 31st, next Tuesday instead of the following Friday as has been customary. Picture show and refreshments, candy and games for Halloween. All are welcome.

A large crowd attended last Friday night when the community club showed the pictures "Around South America" and "The House I Live In".

Coffee, cake and soda pop was served. \$12.75 was realized, all

Don't Neglect Your Hay Fever and "Summer Colds"

by FRED W. WITTICH, M.D.
Chairman, International Association of Allergists

THE sneezing and sniffing that begins this week for millions of hay fever sufferers is a warning to one out of every two of us. More than half the U. S. population has some form of allergy, which, if ignored, often develops into more serious conditions. This can be avoided, however, because new methods of treatment are dramatically effective in coping with these annoying allergies.

The standard treatment for allergy has been the avoidance of whatever it is you are sensitive to and "shots" that immunize you against the offending agent. More recently, however, medical research has turned up drugs that are making the lives of many allergy sufferers more liveable.

During the past year, we have confirmed the fact that the antihistaminic drugs, properly used, can provide considerable relief to most sufferers from allergy. Medical evidence indicates that almost 50 per cent of allergy victims, especially those suffering from hay fever and hives, will obtain spectacular relief from these drugs. Another 30 to 40 per cent will get at least partial relief.

Actually, these drugs have been known for some time to the medical profession, but the first chemical used produced side effects, such as sleepiness and drowsiness. The newer drugs in this field, however, have proved remarkably free from these side effects and have been used with complete safety by millions of people.

These are the same drugs which were made available to the public for use in treating the symptoms of the common cold this year, and which have attracted so much comment both pro and con. As to their effectiveness, there is no doubt that in most allergic conditions, there is release of a substance which doctors call H-substance or more loosely, histamine which is largely responsible for symptoms. It is now clear that the antihistaminic drugs

do block the action of histamine on the system. Innumerable experiments have proved that when the antihistaminic are administered the effects of histamine are counteracted and the allergic symptoms are greatly relieved if not completely eliminated.

The discussion this year around the antihistaminic has centered largely on the question of safety. There have even been rumors that these drugs have actually harmed people. I think my experience and that of allergists is in accord with a statement recently made by Dr. Morris Fishbein, former secretary of the American Medical Association, who reported recently that he had not seen an actual case in which these drugs have ever done any harm. Said Dr. Fishbein, "I am unaware of any scientific verified published evidence or unpublished evidence of harmfulness."

Take for example the case of Neohetramine, the drug known to the public as Anahist. Recently Dr. Harry E. Tebrook, Medical Director of Sylvania Electric Products, using this drug in 3500 cases in a cold study, found only 2 per cent of the people showing any side

effects, and these were, as he put it, no more serious than the effects of a common cold. In another experimental study, this drug was given in doses of 500 milligrams a day to patients every day for six months. Drs. Judd and Heiser of the Pennsylvania State Department of Health, Harrisburg, Pennsylvania, reported not a single untoward effect in any of these patients. In another experiment this drug was given to a series of 232 children from 6 months to 12 years of age, again without any untoward side effects. It was only after these and similar tests that this drug was released to the public.

Other antihistaminics, such as Chlor-Trimeton, Perazil, Benadryl, Pyribenzamine, Thephoran, Decapryn, Neo-Antergan, Hydrylin, Histadyl, Pyrrolazote, each have similar wide experimental backgrounds though they are available on a doctor's prescription.

Another new development available to the sneezing and sniffing public this season is the use of antihistaminic in an Atomizer that applies the medication directly to the effected parts of the nose. The medical profession has long known that fine sprays are sometimes even more dramatic and immediate than internal medication which has a slower though more sustained action. However, most of the drugs that we have used in nose drops or other internal medication have been suspected of adversely affecting the lining of the nose or excessively stimulating the central nervous system. The antihistaminics do not have these properties and may therefore prove a real boon this summer to hay fever sufferers.

With the 3-way treatment now available, avoidance, immunization and symptomatic drug therapy, we are well on our way to effectively controlling allergy. The big danger now is that people who have allergy will neglect it. Doctors now see only from a fourth to a third of all allergies. And recent evidence seems to indicate that untreated hay fever, for example, or allergic skin conditions may in many cases develop into serious asthma.

SPEAKER URGES ATTENTION TO CONSERVATION OF RESOURCES

By Mrs. Gertrude Pearson

CEDAR MILL—"Conservation" was explained by Mrs. A. R. Ringe at the garden club meeting Wednesday, October 18 at Leedy Grange Hall.

The importance of preserving our natural resources for future generations was emphasized along with the necessity of making plans for a rounded conservation program. Keeping soils fertile, preserving forests, and wild life and water purification were stressed as some of the important conservation points.

Mrs. B. D. Litchford gave information on wintering dahlias, fuchsias and tuberous begonias as an addition to the program.

A service project of supplying flowers at Veterans Hospital will be carried out by the garden club

in conjunction with other clubs, possibly in February. A nursery program for care of children during meetings was referred to a committee for discussion and planning.

A joint meeting is scheduled with Beaverton Community Garden club Nov. 17 at which time Dr. Hanley will speak on rhododendrons and related topics.

At the next regular meeting Nov. 15 Mrs. H. B. Isom will demonstrate holiday arrangements.

CHURCH DINNER EVENT
A good attendance was present at the semi-annual dinner of the Cedar Mill Community Church dinner held Wednesday evening October 18.

Following dinner sound films of Pocket Testament League work in Japan were shown by Rev. Simon E. Forsberg.

NEW STORE MANAGEMENT
Cornell Grocery has changed management and is now being operated by Mr. and Mrs. Carl Stark owners of the store building.

They have purchased stock from A. Alkorn recent proprietor.

MISSION WORK IN BRAZIL
Guests of the James Walters during the latter part of last week were Mr. and Mrs. Robert Judge and small daughters.

The family had returned from Chicago, Ill. and Wisconsin where they had been in attendance at a summer camp. They left Monday for San Francisco to secure visas for Brazil where they plan to take up missionary work in the near future.

Mrs. Judge was formerly Barbara Walters.

Turkey Dinner
Don't miss the delicious turkey dinner (\$1.25 for adults) to be served 1 to 8 p. m. at Beaverton Legion Hall Sunday, Oct. 29. Public is invited — bring your friends.

Nine County 4H Club Members In Nat'l Contest

Nine Washington County 4-H club members have been judged county winners in National 4-H club contests it has been announced by County Extension Agents, Margaret Skaar and Joe Cox.

These 4-H members will represent Washington County in state competition where they will compete for college scholarships and trips to National 4-H Club Congress held in Chicago December 4-8.

Winners in the various contests are: Shirley Kurtz, Route 1, Gaston, Health Improvement; Lella Reed, Route 1, Beaverton, Food Preparation; Alice Knox, Route 1, Gaston, Dairy Foods Demonstration; Joan Karns, Orenco, Home Improvement; Sally Hornecker, Route 1, Cornelius, Farm Safety; Elaine Hansen, Route 1, Beaverton, Garden; Homer Zuver, Route 1, Sherwood, Poultry; Edward Neill, Route 4, Sherwood, Tractor Maintenance and Stanley Marugg, Garden Home Dairy.

Awards for county winners are handsome medals. Also winning county medals as runners-up are

Mary Meier, Route 2, Hillsboro—Dairy and Wilbur Zuver, Tualatin—poultry.

The members' records are judged on the basis of over-all club work. Points considered are projects completed, competitive record, demonstration and judging contests entered, leadership, and community activities.
