

CHRISTMAS GIFTS FOR KLONDIKE

Have Been Lying at White Horse All Winter.

(Journal Special Service.) VANCOUVER, B. C., July 10.—A dispatch says: "Ton after ton of newspaper mail, which was laid up at White Horse and other points in the winter because only first-class matter is carried on the closed season of navigation in the North, has been pouring into Dawson since the river opened for navigation. The Postoffice force of 10 men has worked day and night distributing this and fresh mail. Most of the delayed second-class mail is so old it is worthless, but with it are many photographs, bundles, Christmas presents and the like, which have some value. The total number of sacks of mail received is about 700, of which nearly all is distributed. A little remains to be distributed. No delayed second-class matter, it is said, is going in by the lower river this year."

ANDREE STORY ONLY A FAKE

(Journal Special Service.) VANCOUVER, B. C., July 10.—The Vancouver World prints the following with reference to the story of Andree's death at the hands of Eskimos in the Far North: "Some months ago the World, on the authority of C. C. Chipman, Chief Commissioner of the Hudson's Bay Company, was able to knock on the head a yellow report from the Far North that the remains of Andree, the missing balloonist, who tried to find the North Pole, had been discovered. The false report returned to consciousness on Sunday when a gullible Chicago paper published a special from Winnipeg saying that Rev. Dr. Ferrier, a Church of England clergyman, had arrived from York Factory, bringing authentic news that Andree had been killed by Eskimos. The clergyman has today denied to the World correspondent in Winnipeg that he said anything of the sort. Mr. Ferrier came down to Winnipeg from York Factory to have a wounded hand attended to. When interviewed this morning on behalf of the World he simply reiterated what has been known ever since this newspaper published Mr. Chipman's statement, that the rumor originated through the too lively belief of a young officer in the tales of Eskimos. Mr. Ferrier said that no trace of Andree had been discovered by the Eskimos, despite the fact that an enormous reward was offered for the slightest evidence of the report that he and his party had been killed. Mr. Ferrier is very indignant over the 'fake' story wired East and West."

NEW YUKON STAMPS

(Journal Special Service.) OTTAWA, July 11.—The Department of Indian Revenue has received two new series of stamps which are works of art never before equaled in Canada for many years. They are designed especially for use in the Yukon. All the stamps are of uniform size, one and one-half inch, and are of six denominations, 10c, 25c, 50c, \$1, \$2 and \$3. The red color is inscribed Dawson Mining stamp, and is to be used in payment of all mining fees. The stamp is the representation of a prospector in the act of picking up a nugget. The law stamp for the Yukon Territorial Court is blue, with a figure of Justice holding scales in her hand. The artist has made the departure from the traditional engraving in that he has removed the hoodwink from the lady's eyes.

HOT DUEL

(Journal Special Service.) AMERICUS, Ga., July 11.—A farmer named Gynes, residing on the Stappery plantation, near Americus, killed a colored farm hand, dangerously wounded a negro woman and was himself shot twice as the result of an altercation with the negro. Just as Gynes shot at the negro the woman stepped in range and received a load of shot in the abdomen. The negro succeeded in killing his adversary. Gynes claims he acted in self-defense.

HANGED HIMSELF

(Journal Special Service.) CHICAGO, July 11.—Theodore Gelfner, who murdered his wife and wounded his baby and a 17-year-old stepdaughter, committed suicide in his cell at the police station with a rope made from his undergarments. Earlier in the night the prisoner expressed sorrow over his crime, and about midnight he was apparently dozing. Gelfner's wounded baby is still alive, but probably will not recover.

MINING NOTES. Captain Shaw has received by express \$100 worth of gold nuggets from his placer claim on Grave Creek, 30 miles north of Grants Pass. The nuggets represent a clean-up that one man made in a few days' work. They run from the size of a grain of wheat to a bean. It is said that with hydraulic machinery the property could be made to yield \$200 a day. By the process now used much of the fine gold cannot be saved.

G. Anderson and E. Miller were down yesterday from the St. Helens mining district for supplies. They have a contract for driving a 500-foot tunnel on the Goat Mountain property, and also one 100 feet in length on the Independence claim. The men started today on the return trip to the mines. They go by boat to Toledo, and from there cover the balance of the distance, about 20 miles, by wagon road and trail.

J. M. Moore, secretary of the Board of Trade, has some fine samples of ore on display from some newly located claims in the Bohemia district. They belong to the Gold Mining & Investment Company of this city, of which Valentine Brown is secretary. The claims are adjacent to a well-developed property and the surface showings are of the very best, showing both gold and silver.

I don't care a cent in the world, I can truthfully say, and yet When I buy a new hat, And I don't pay for that, I am here over heels in debt.

THE LAST DAYS OF THE EDUCATORS' CONVENTION

(Journal Special Service.) MINNEAPOLIS, July 11.—The same ardor and enthusiasm that was manifested early in the week marked the closing sessions today of the National Educational Association's convention. In many respects the convention has been the most notable ever held by the association. In the various departments more than 100 sessions have been held during the week and in all the discussions have been marked by intelligence and animation and have drawn forth a free interchange of views tending to the general enlightenment of the educators in their art.

Before the general session this morning the principal speakers were Hon. William T. Harwin, United States Commissioner of Education; Charles Payson Curley Scott, editor of the Century Dictionary; Professor Thomas Clarkson Truitt, of the University of Michigan, and Superintendent Carroll Gardner Pearce of Omaha.

"The Use and Danger of Method" was the subject of an interesting paper read before the department of elementary education this afternoon by Superintendent W. A. Mills of Crawfordville, Ind. In part, Professor Mills said: "Education is a movement in the life of the individual or community. Teaching is an art employed in facilitating and directing this movement along lines believed to be wholesome. The educational process is according to certain laws determined by the nature and sequence of activities through which the individual must pass if he is to grow. Teaching

It contains a great deal of information in compact and readable shape, and a topographical map of the state, showing the principal cities, towns and points of note, as well as the lines of the company.

The growth of Coast travel is daily increasing. The railroad and steamboat companies, especially since the engineers' strike is over, are much pleased at the rush.

Several changes in Railroad Row are liable to occur. The vacancy caused by the death of William H. Mead in the general agency of the Omaha is to be filled, for one thing.
