THOSE PERUVIAN BONDS
According to the testimony before the senate finance committee those \$100,000,000 of Peruvian bonds are now worth about \$7,000,000, and the American people who invested in them will lose about 93 per cent of the money they put into them. The bankers that floated the loans made \$5,475,000 gross profit on the deal, and got entirely out from under, thus letting the people who purchased the bonds hold the bag. The New York bankers paid \$415,000 rake-off to the son of President Leguia for the privilege of shoving these Peruvian bonds over onto the American people. Some people call that a bribe.
