LOCAL BALLOTS FOLLOW TREND Poet-Prospector Reynolds OF STATE NATION

South Jacksonville Goes All Democratic While North Precinct Favors Martin Four to One

Election day in Jacksonville pretty much reflected sentiment of the county, state and nation, rewalking. The cookhouse was built sulting in an avalanche of democratic votes expressing confidence and encouragement for the New Deal and its defenders. Governor Martin, democrat, led the field almost three to one, with Dunne trailing just ahead of Peter Zimmerman.

For county offices Jacksonville voters favored Earl Day for county judge, Caster for commissioner and Syd I. Brown for sheriff. Moore Hamilton, young editor of the Medford News, led the field of candidates of both parties for rep-resentative of this district, with A. E. Brockway ranking second,

Glenn O. Taylor third and William Grenbemer fourth. Two referen-dum measures were defeated, the Healing Arts amendment being snowed under 215-95. Jacksonville voters favored the 20-mill tax limlots, while Tom Miller was written

In south Jacksonville precinct thought. The papers told us how every democrat on the ticket car-this rainmaker had built himself a ried and precinct committeeman, every democrat on the ticket car-Joe B. Wetterer, democratic reprewhere (San Diego, I think) and sntative in that section, was smiles as he reviewed the fine bourbon record. However, an interesting development was found in north Jacksonville precinct balloting, which swung majority-giving votes

to republican nominees. North Jacksonville, normally republican, and republican in nearly every office on the ticket, was about four to one for Candidate Martin, democratic governor nominee, giving him 132 votes, Joe Dunne, republican, 43, and Peter Zimmerman,

independent, 25. A total of 147 votes were cast in south Jacksonville precinct, with 206 in north precinct. Election boards were as follows:

South Jacksonville-Joe Wetterer, judge; Emil Britt, chairman; Addie Smets, first clerk; Mrs. Paul Godward, second clerk, and F. A.

North Jacksonville-Harry Hinclerk; Ida Wilson, second clerk, and Wesley Hartman, third clerk, In the city election incumbent officials were reelected as follows: Wesley Hartman, mayor, two-year term; E. S. Severance and Peter J. Fick, councilmen, two-year terms; Ray Coleman, city recorder, one-year term, and C. C. Chitwood, treasurer, one-year term. There were few scattered write-in ballots cast on the city ticket, which was voted at the city hall only.

low we know why they call 'em political doesters. Their forecasts are all dopey.

And, judging from the returns, those old-line New Deal critics got a new deal election day.

Half the world looks for an excuse to celebrate, while the other celebrating.

ORDERS GIVEN TO Miners Get \$150 from Rainmakers Were Fakes, **But One Nearly Drowned**

By J. C. REYNOLDS

got all tangled up with a young hurricane which visited the shores of the New England states. This was the famous "September gale" of which mention was made in the

I guess everybody has read Oli-Wendell Holmes' description of it in his comical poem, in which he tells of seeing his Sunday britches go straddling off like witches, from the clothesline on which they were drying.

Id, Wooly West Is Not Thing of Past R. I., then, a city of 100,000 popu-lation, which is situated at the head of Narragansett bay. I didn't lose my breeches or anything else in that storm but wer surely would have lost the roof to our house if it hadn't been nailed on pretty tight. About half the roofs in town were blown off, big oak trees uprooted and the air full of boards, boxes, shingles and other articles that the wind could pick up and blow around. Then, at the height of the confusion, a tidal wave 22 feet higher than the highup the bay with the speed of an express train and when it reached the vicinity of Providence, where chips, slammed them violently up on the shore, or against the wharves, wrecked houses and inundated all the cellars in the lower part of town.

Hell was to pay and nothing to pay it with. This wave appeared so quickly that the righteous Puritans of the city had no time to ring the church bells and scare it away. They had purphesied for a long time that the Lord would destroy looked to them as if the thing was about to come to pass. The worst of it was, the majority of them were not quite ready to have it done. So fervent prayers were sent up to postpone the calamity till some other time and consequently when the storm had worn itself out next day it quit and all was peaceful again. My Dad did some fervent praying himself and I guess that was all that kept our placed or lost his badge at the roof from being blown off, which Marble Corner while in his cups. would have been quite a disaster.

When I was a very small boy I ary and March of that year, up to that time, had been exceptionally fine and I had been taking advantage of the nice weather by prospecting the mountains west of the Sacramento valley. For convenience I had made arrangements to board at a nearby logging camp, which saved me a lot of hard on high ground on one side of a ravine about 40 feet wide, and the bunkhouse was on high ground on start to finish. January, Febru-The ravine was the other side.

crossed by a cable footbridge, just wide enough for a board walk and havving hand rails of wood on each side. The bridge was exactly 12 feet above the floor of the ravine. In the daily papers we read of a famous rainmaker who had made a contract with the state of California to furnish 20 inches of water for \$1000. I will not be sure if it was 20 inches or not, but I think it was and we will call it that anyhow in this story.

The reason I do not remember the exact number of inches was because I knew of a number of attempts made by rainmakers in the dry country east of the Rocky mountains, all of which were fail- itation measure 173-136. Judge ares. So when this story came out Norton was favored with 219 bal-I naturally thought it to be another fizzle and gave it scant at-in on 51 ballots. Electa Fehl, wife tention. tower down on the coast somehad shut himself up in it, denying admittance to everyone, though to reporters he confided that it was easy enough to make it rain if one only knew how to go about it.

Anyway, one night it started in to rain and when I say rain, I mean rain. It poured all night long and when morning came we found ourselves on an island and the only way out of there was that narrow little cable bridge across the ravine. And the ravine was now full of water, up to within a couple inches of the bridge. Twelve feet of angry water and still rising. We managed to get across to break-fast. Half of the cookhouse had would have been quite a disaster. been swept away by the flood, but Years after, out in the wild and the nervy cook had stayed with it wooly west, I got mixed up with a and dished us up some ham, eggs lot of water when the dam of a and hotcakes in the half that was Ike's trapline for several miles and, although special traps for the Yes, that most beloved of all radio

Wild, Wooly West Is

Most people think of the wild west as a thing of the past, but it is not so. Proof? Sure, right here in Jacksonville-one of the whing-dingdest gold camps in Oregon

One morning early this week, right in front of The Miner office, a small lad, probably not yet four years old and just able to talk, had his cap bill pulled over his face the printer's devil and burst by out with "Keep yer dirty hands est high water mark came racing to yerself, you big son-of-a-b-

Anyone who thinks the far west is sissy country had better revise their ideas. The young brats here the bay narrowed to a head, it are still nearly as tough as their tossed the shipping around like New York cousins.

1912 Chauffeur Badge **Found Marble Corner**

Workmen at the Marble Corner, during their remodeling and cleaning, uncovered an interesting relic of an early day when they discovered a chauffeur's badge issued time that the Lord would destroy by the state of Oregon in 1912. It the city of Providence on account bears the number 1349 and is a of its wickedness and this storm replica of an old-fashioned atomobile wheel and tire of that time.

The badge takes on more interest when it is remembered that the first automobile to enter southern Oregon came in 1908. In 1912 an automobile stage line was in operation between Jacksonville and Medford, running in competition to Bill Barnum's railroad, and it was thought by several the chauffeur for this line might have mis-

The Marble Corner, now operated as an inn by Sally Cole, also uncovered what is believed to have

Three Days Workings More than five ounces of good ld gold from three and one-half days of effort is not so bad, but to do that in someone's yard is even better, believe D. M. Bates, Tom Dickey and Joe McIntyre, who

Something had to be done and done soon, else Ike was to lose his winter's income as well and a large crowd is expected. as his self respect. Brain trusters not being available at the head of Star gulch, Ike had to figure it out alone

"That **!! Ib & Ib % ttt!! coyote invariably turns every trap upside down and then holds a victory dance on the darned things just to show his contempt," mused Ike. "T'll just cross him up today and set the trap upside down to begin with." And Ike licked his chops and prayed that the scheme would not fail him. It didn't and next day Ike found a completely subdued coyote almost dead from humiliation. The conclusion is best repeated in Ike's own words:

"That coyote was about the maddest and worst whipped critter I ever seen. He'd just kinda look at me from under his brows in a completely-licked sort of way," grinned Ike. "So I gave him the worst cussing he ever had, and went over to a young sapling and cut myself about a four-foot club to use in collecting several debts via the hide route. I made several passes at Mr. Coyote to see if he was going to flinch and then, re-peating the Lord's Prayer almost complete, I whaled the tar right out'en him."

The Miner is happy to offer the upside-down trap trick to the gov-ernment for the next Geneva meeting in case Washington gets tired of having its traps turned upside down and robbed.

Vandals Steal Food **From Local Larder**

Thieves, taking advantage of the absence of Mr. and Mrs. Art Curry between the hours of 7 and 9 o' clock Sunday night, broke into and looted a cooler on back porch of their residence in this city. All foodstuffs were confiscated, save for a partly-used can, which was discarded. And the Currys were looking for transients or neighbors with jam on their fingers as they restocked their pantry.

Examiner, or to any of the other big daily papers of California of March, 1905, and they can see the account of the whole thing from could hear great boulders grinding around in the bottom of the swift-

By C. M. Payne ly-racing current. The strongest swimmer alive would have no chance in that torrent. And it began to look as if some big log would take the bridge out and leave me marooned on that island, and not a thing there to eat.

It began to look like moving day for me so I went back to the bunkhouse, rolled up my sleeping bag, packed my war-sack, strapbag, packed my war-sack, strap-ped everything firmly on my back and started. Arrived at the bridge, I stopped and looked at it a long time. Logs were coming fast now and every once in a while one would hit that old footbridge and local it compared foot out of line. knock it several feet out of line. There was only one thing to do-trust to luck. Carefully I felt my way along that crazy structure through the swirling water that had now covered the board walk and was about two-thirds of the way across when a big log knocked

the bridge right out from under my feet and I sat down flat with a leg on each side. That was nothing but luck for if I had fallen on either side I wouldn't be here writing about it now. I just sat there in the water for a full minute till I got my breath and nerve back, then I boosted myself very cautiously to a standing position, which with the heavy bundle on my back took about all of my strength, and made a run for the other side. Then I pulled out for my little house down in the valley where I had plenty food, wood and everything I needed and holed up for the next 10 days while it rained pay the money. That's all I know steadily without any let-up. Talk for sure and all any doubter can about floods. There was more do is to obtain any of the big water sloshing around in California then than there was in the Pacific ocean. Every bridge on the Sacramento river was washed out at that time and talk it over with the lowlands till it was 30 miles wide. Then the rain ceased and the maker he had been sent for to try

Gold Buying Averages \$6000 Month for J'ville

The buying of gold over counter, cash-on-the-barrel-head, continues at a most steady pace, said Buyer G. W. Godward here this week. We are averaging about \$6000 a month over our scales, which is a high for many years from Jack-sonville's back-yard independents," explained Mr. Godward.

Local gold, for the most part, is produced in small quantities from city lots and nearby claims, most of it being of the placer variety. Few small producers now ship di-rect to the mint, Godward said, they having decided red tape and expense more than offset the small argin on which the buyer works. Godward averages about \$28 per ounce payment to the miner for raw gold, metal being about .860 fine.

"all right," and turned his machinery loose again and down came four inches more. That filled the bill, with two inches over for good measure

So the state paid him \$1000. "But," I hear you say, "that's all hooey. No man could make it rain like that." I think myself there was a lot of hooey about it. But this guy made a fair, square contract with the state of California to furnish so much water for \$1000. The water was furnished pay the money. That's all I know California papers for March, 1905, and read it for himself. I often run across fellows who were there
