Welding
... the best way to make a perfect union of two pieces of metal is by welding them together.

... and the best way to get a more pleasing flavor and a better taste in a cigarette is by welding together the different types of tobacco ...

That is just what we do in making CHESTERFIELD Cigarettes—the three types of mild ripe home-grown tobaccos, that is tobaccos grown in this country, are welded together. Then they are welded with aromatic Turkish. When these tobaccos are welded together you get a combined flavor which is entirely different from any one type of tobacco. It is this welding of the right amounts of the right kind of tobaccos that makes CHESTERFIELD a milder and better-tasting cigarette.

Chesterfield... the cigarette that's Milder
Chesterfield... the cigarette that TASTES BETTER
