

Sixty members and invited guests from different parts of the county attended the hard-times Hallowe'en dance Tuesday night, sponsored by the Radio club. The happy affair was held in the Radio club room in Pioneer hall. Officers in charge of the dance were Guy Good, Floyd Dickey and Max Crownson. Music was by Dickey's orchestra.

Better Housing workers distributed 10,000 FHA leaflets during Fire Prevention week in Oregon. These leaflets showed how FHA insured loans can be used to reduce fire hazards in the home and business property. Plans are being made now for FHA cooperation with the American Red Cross in a state-wide campaign to lessen the number of accidents in the home.

The W. F. M. S. of the M. E. church is holding its regular meeting this afternoon at the parsonage, with Mrs. Melville T. Wire as hostess.

The earliest snow ever recorded in Oregon fell Tuesday, so if you were alert enough to get a squint at it you saw something historical.

The Ladies Aid and the Friendly class of the Presbyterian church met in joint session Thursday for an all-day meeting. A covered dish luncheon was served at the noon hour.

There seems to be a lot of fussing about a site for the new capitol. The average taxpayer is thinking more about the tax bill than he is of the site.

The Martha Gillette guild of the Presbyterian church will meet this evening at 7 o'clock for a special meeting. The regular meeting is next Friday evening and will be held at the McConnell home on Church street.

The West Side Ladies Aid of the Methodist church is to hold its regular meeting next Tuesday at the home of Mrs. Ralph Billings in West Ashland, the opening session to be at 2 o'clock in the afternoon.

**LIFE INSURANCE IN ACTION**

Three years ago last May, a fourteen year old boy at Day's Creek, Oregon, decided to start an insurance contract with some of his earnings to protect his mother and to save for himself in later years.

Last Sunday I received notice of his death and went to make out the usual papers for the claim, as the contract was with our company.

His mother went to Roseburg with me, and on the way back to her home she told me that his last sickness and other bills were over \$800.00.

She will receive \$1000.00 because her boy saved \$22.00 a year for three years.

When we see these things, do you wonder that we like to explain about insurance to everybody, especially the young men just starting to earn some money?

Life Insurance always pays. It pays your loved ones if you die too soon, or it pays you an income in your old age.

**Townsend Club News and Views**

(By C. M. C.)

The House of the Oregon Legislature has voted 36 to 24 in favor of the Townsend Plan. A victory, it's true, but the best part of the whole thing is the fact that the people of Jackson county and all of Oregon may find, simply by reading the roll call on the measure, the names of those who do NOT favor the Townsend Plan.

Most Townsendsites in this part of the country felt that Moore Hamilton, editor of the Medford News, was in favor of the Townsend movement. Assemblers Hamilton and Taylor, both of Jackson county, were two of the twenty-four who voted AGAINST the adoption of the measure!

The consolation in the matter is that we found out before another election.

I attended a meeting in Phoenix the other evening—a Townsend meeting. It wasn't a large meeting; there was no special speaker. There were young folks there, and old folks too with silvered hair. It was the liveliest crowd I had been in for some time, everyone joking and laughing until the meeting was called to order, and then procedure in a business-like way, which bespoke of real harmony. They told of making a neat little sum at an ice cream social they had put on recently. Aye, it was a nice meeting and I have made up my mind to attend more meetings and in different places.

When a politician, or an organization, tries to convince the Townsend movement that he, or it, is in favor of the Townsend Plan, and then PROVES to be false, we say that "they were just trying to worm their way in." Surely there is no word more descriptive of their character than the word WORM.

In the finest lumber worms will bore and more and cause to rot, unless removed, until the entire piece is ruined. Our Townsend movement is built of staunchest oak, but the worms have, and will continue to enter into the very vitals of our organization. Let us be always ready with an insecticide.

Townsend Club secretaries, please. This is your column in a paper that editorially supports the Townsend Plan. Will you please send us the news each week of your local club? It will help a whale of a lot and you may be sure I'll be thankful for it.

The following was left on our desk:

All informed people know that this, as well as all other depressions, is caused by deflation. Also that the reverse of the cause—reflation—is the only cure.

The Townsend Plan will reflate our monetary system with cash, affording us a medium of exchange not controlled by Wall Street and not deflatable.

Modern business is struggling to get on a cash basis. Why, then, will some one point out to this writer, should not our Nation get on a cash basis?

Rain doesn't make any difference to real Townsendsites, and the fact was well proven last night when the Townsend dance in Moose Hall brought out a crowd that filled the house.

**SOUTH FORK MAN IS FIRE DUNKER**

The following report is submitted as an example of quick action in fire suppression in the Butte, Falls district:

On July 17 Mr. Richard Barnhouse, leader in the South Fork CCC camp, was camped out on trail maintenance. At 8:00 p.m. lightning was seen to strike approximately one mile away from camp. Mr. Barnhouse left immediately for the fire. The following report was submitted by him:

"8:15 p.m. July 17, found fire burning in small snag. Pushed snag over (fire corralled 8:25 p.m.); Picked up snag and threw it into the lake (fire out at 8:30 p.m.). Returned to camp 8:45 p.m., July 17."

—Six Twenty-Six.

**SIDE CAMPS TO BE IN 'WILDS'**

**OAK KNOLL**—Three winter CCC spike camps will be operated out of Oak Knoll, according to reports. One will be at the Yreka fairgrounds and two in the Salmon River country.

The last two are needed to complete the Forest Service telephone line from Yreka to Sawyers Bar.

The men stationed at these camps will be seeing the real "last frontier" in America. U. S. maps show that area as primitive country as yet unmapped or surveyed. Deer, bear, cougar, coyotes, fox and other wild game abound there. The river teems with the fish it is named after. For those men who really enjoy outdoor life instead of the effete life of "parlor snakes and lounge lizards," this is a real opportunity.

Line forms at the right.

Contractor Harold Blake of Portland started work Monday on the 5.12 miles of the Ashland-Neil Creek grading part of the new Siskiyou highway route. A crew of ten men began clearing for a culvert at Neil creek.

Of the more than 5,000 modernization loans reported by Minnesota lending institutions during the last year, not one has defaulted. The loans aggregated more than \$16,000,000.
