"EXPERIENCE IN MACHINERY
LED ME TO pick
rollator refrigeration"

writes a technical man from Dayton

Of course. Anyone skilled in its mechanics would choose Norge for its mechanical superiority. Just as an economist would choose it for its savings. Or a modern housekeeper decorator for its beauty.

Consider all these factors when you select a refrigerator for your home. When you have satisfied yourself that Norge is the beautiful refrigerator, with the best planned interior arrangement and the most conveniences, then look to the mechanism.

The Norge Rollator cold-making mechanism has but three slowly moving parts, is surplus powered, almost everlasting, actually improves with use. And it uses so little current that Norge savings—in food and refrigeration costs—are as high as \$11 a month. Many Norge owners report even greater savings.
