

TOWNSEND TOPICS

Our so called great statesmen in charge of our government are spending their time and energy—and our money—in an attempt to create new markets in China, Russia, South America and Africa.

The people back of the Townsend Plan are fighting to create new markets for American goods in America—in our own back yard. The Townsend Plan will create a market for American made goods our own country, instead of try-

among the unemployed people in ing to create a market among the poor destitute people of other lands.

We challenge the efforts being made to ship American goods out of this country, when they are needed by our own people, and the importing of foreign goods into our country which can be produced here at home.

The politicians in charge of the government gave to foreign countries billions of goods, and billions of dollars in money, to carry on a foreign war, killing one another. Those foreign nations used the goods and refuse to pay back the money.

These same politicians are now trying to arrange a market in this country for those same foreign nations which repudiated their obligations and debts.

When our government has developed a market in this country and supplied our people employment and all they need at home, then and then only, will there be need for the development of new markets in foreign lands.

The Townsend Plan will create and develop the greatest market in people, right here at home, without issuing bonds or loaning money to foreign countries or fighting foreign wars.

We need the Townsend Plan, a new national policy, and a realization by American politicians that the American people come first.
