

DR. EVERETT MOVES
 Dr. E. G. Everett, physician and surgeon, will open new offices in the Swendenburg building Monday, according to an announcement yesterday. Following more than two years association with Dr. C. A. Haines, Dr. Everett will assume private practice. Dr. Everett came to Ashland from Grants Pass.

CHASE RITES HELD
 Funeral services for Harry E. Chase, who died Oct. 14 at the family home on Liberty street, were held from the Litwiler funeral home Thursday afternoon with elders of the church of Latter Day Saints officiating. The remains were shipped to El Paso, Tex., for burial.

W. B. King has returned to his home on Fourth street following several days medical attention at the Community hospital.

CITY RENEWS ELECTRIC TIE WITH COPCO

CONTINUING the arrangement in effect here for a number of years, Ashland city council members approved a five-year contract with the California Oregon Power company at Tuesday night's meeting, the new pact replacing one to expire at the end of the year. The city electric store, operated by the power company, will remain in the recorder's office.

The city of Ashland has, for a long period, produced from 20 to 80 per cent of electricity consumed here at the municipal power house on upper Ashland creek. During wet seasons the small plant produces all power used here except during peak hours in early evening, while summertime production drops to about 20 per cent when water supply is lowered. The Copco contract will continue the stand-by service furnished the city, with a minimum monthly service charge of \$400.

The new contract, approximately the same as the older agreement, will deliver Ashland its first 50,000 kilowatt hours per month at the rate of nine mills per kwh, the second 50,000 for eight mills and all over 100,000 kwh at 7.5 mills per kwh. Should the Copco-supplied electricity exceed 50 per cent of the power consumed here, the rate would be paid at 7.5 mills that month.

Although public utilities are supposedly non-paying investments on the part of taxpayers, the Ashland plant has, since its installation many years ago, paid handsome dividends to the city, consumers here enjoying one of the lowest rates in the state, as well as the revenue going far toward paying the city's operating expenses.

Councilmen issued a building permit to Ray Clary for a \$1500 frame dwelling at 253 Granite street, and instructed Chief C. J. Baughman to paint the old fire truck, and City Supt. Elmer Biigel was authorized to purchase a new dump truck for the city.

A cemetery department report indicated that expenditures in that division have nearly exhausted the budget allotment, with three months yet remaining.

TWINS BORN HERE
 Mr. and Mrs. N. H. Church of Siskiyou were parents of twins born at the Community hospital Wednesday noon. One, a boy, weighed in at six pounds, seven ounces, while his sister weighed six pounds, 12 ounces.

Mrs. Madeline Noster and family, Hornbrook, visited with friends and relatives in Ashland this week.

Mr. and Mrs. L. E. Davis have moved from 1922 Siskiyou boulevard to their new residence at 291 Mountain avenue.

NAVY DAY

• Battleships float and sailors climb ropes — but here are a few things you never knew about your United States Navy!

Each ship has its sick bay. Above is the dispensary on the U. S. S. Salt Lake City. Running this part of the navy is the medical corps, which also takes a leading hand in health measures in Uncle Sam's outlying possessions.

The farmer feeds the navy. Here are stores being taken aboard the U. S. S. Bussard in Chefoo, China. Thanks to advances in storage and preservation of food, sailors no longer must exist on smoked and pickled meats, dried vegetables and hard tack.

Thanks to the navy, America's clocks are kept on time. At the naval observatory in Washington is the "X" which marks the spot of zero longitude and zero latitude for all official measurement in the United States. Twenty times daily, time signals are broadcast from the observatory.

TEACHERS WILL CONVERGE HERE

(Continued from page 1)

11:05 a. m. and continue through noon. Departments covered will include physical education in the rural schools, physical education and its relationship to athletics, finger painting, primary education, school administrators and high school teachers, home economics, band clinic, drama, social studies in upper grades and junior high school, junior high school chorus clinic and vocal problems.

Friday luncheons will be held for music instructors in Bellview Grange hall, for principals and superintendents in the Lithia hotel, for high school teachers in the junior high cafeteria, for grade school teachers in the Elks temple, male physical education instructors in Nimmer's cafe, and for female physical education instructors in the Ashland hotel.

County meetings will get under way in the administration building at 1:30 p. m., and a general assembly will gather in the physical education building at 2 o'clock. A Klamath Falls boys chorus, band ensemble and an address on "The Universities and Modern Education" by Dr. Donald M. Erb of University of Oregon will feature the session.

Sessions End Saturday
 At 3:45 o'clock Friday afternoon sectional meetings again will take up, with the Normal school, junior and senior high schools housing classes.

Saturday morning's program will be opened with a general assembly in the SON'S gym presenting the Jackson County Teachers' chorus and other features including talks by R. E. Gilette, Dr. Hart, a chorus ensemble directed by Mr. Lawrence, and closing announcements by J. Percy Wells, Klamath Falls, presiding.

GROUP STUDIES LITHIA SPRINGS
 A special committee, appointed by Mayor T. S. Wiley to contemplate recommendations on the realization of the greatest possible benefits to be derived from Ashland's city-owned lithia springs, filed a report to the city dads this week.

The report strongly recommended the rigid protection of the springs from commercial exploitation, reserving them for health and resort resources.

The complete report, as tendered Mayor Wiley and the council by members of the committee including H. C. Galey, Frank Jordan, O. F. Carson, Herschel Claycomb and George Green, recommended:

1. That the city always retain for itself the complete control of all the products of the springs.

2. That the city consider the advisability of extending the pipeline from present source of supply at the springs on up to tap the waters of the old original Gilette spring to improve the quality and quantity of water available at the fountains in town.

3. That a study be made of the present pipe line from the springs to the fountains with a view of

eliminating uneven pressure in the pipe, or too low pressure at certain points, in order to maintain as even pressure as possible throughout to preserve the gas content of the water at the same high level as found at the springs.

4. That careful attention be given at all times to the proper and adequate upkeep and preservation of the property, but that no money be spent at present for parking or beautification of the grounds.

5. That some attention and thought be given to the future

development of the springs medicinal and sanitarious poses.

6. That, whatever event may be done with the property, the drilling of a well or well any part of the property be absolutely forbidden at all times, except possibly remote from springs and at a higher level, even it might be desirable to cure a fresh water supply at future time.

7. That some attention and thought be given to the future

development of the springs medicinal and sanitarious poses.

6. That, whatever event may be done with the property, the drilling of a well or well any part of the property be absolutely forbidden at all times, except possibly remote from springs and at a higher level, even it might be desirable to cure a fresh water supply at future time.

7. That some attention and thought be given to the future

THE TIME HAS ARRIVED

The time has arrived when you can't put off getting ready for winter much longer... anti-freeze time is here, and that means a check-up of your cooling system and selection of some effective solution to protect your car during the winter. The season also brings with it an unusual strain on your battery, upsets your carburetor adjustment... In fact, the change of seasons indicates that a complete motor check-up is in order. Save yourself inconvenience, unexpected battery and motor failure and save money by letting us look over your car. You'll be glad you came in to see us!
