the Lincoln legend

offers a striking comparison between present day living and that of Lincoln's boyhood days. True, not everyone lived in poverty equal to his, but no one, not even the richest people, had the comfort and convenience of electric living that low cost electricity brings to all today.

- Lincoln studied by the light of a log fire. Today's children may have their own I E S study lamps, scientifically designed to prevent eye strain. Adults, too, may easily enjoy the benefits of Better Light for Better Sight.
- The same log fire that provided light provided the heat for cooking in the Lincoln log cabin. Today's kitchens use automatic electric ranges for cooking, and protect the family foodstuffs in an electric refrigerator.
- Lincoln's mother died young, worn out with the drudgery of existence. Today's young mothers have every electrical aid to make home making easy and pleasant, such as washers, irons, vacuum cleaners, and dozens of handy appliances.

If your home is not completely equipped for electric living, you owe it to yourself and your family to find out how easily you may acquire all the modern electrical aids to happy living. There are several income payment plans to meet the needs of every family.
