## We Have an Automatic Electric Water Heater

Some of these high pressure ads now-a-days say that soap prevents "B.O.," but after all I think hot water is necessary too. Mommy says electric water heating costs so little now that any one can afford its great convenience. How delightful it is to have hot water at just the right temperature, always ready in the hot water faucet just as constantly and as readily available as the cold water supply. After a day and night of hard playing, crying, wriggling, and sleeping, a good hot bath at just the right temperature is the finest tonic a baby can have.
