INFORMATION

Will be given to those who are preparing to do their re-building, renovating, new building or contemplating on installation of furnaces, or other heating equipment. If you wish plans or estimates on any work done on your home or new building, get in touch with the advertisers on this page, or call the Southern Oregon Miner building department, 8561, and we will gladly cooperate with you.

BUILD AND REPAIR NOW!

Now is the time to build. Own a home of your own—it's the difference between living and just merely existing. There's so much more comfort, so much more actual happiness in owning your own home. And now with prices so reasonable and payment terms so liberal, there's nothing to hinder you from realizing your ambition. So if you are planning to build or remodel your home, you will find on this page the helpful services of members of the building industry who will be glad to serve your needs.

M. C. Lininger and Son

M. C. Lininger and Son have been serving people of southern Oregon for 25 years. They are agents for Santa Cruz plastering and regular cement and can furnish sand, gravel or crushed rock on an hour's notice.

This builders' hardware and supply store is located at 3 North Main street in Ashland and the telephone number is 5521.

M. C. Lininger and Son also feature a full line of farm implements and supplies.

Ekerson Paint and Roof Store

The Ekerson Paint and Roof store has for more than five years been serving the home owners and builders of southern Oregon from one of the largest and most complete roof and paint stocks in the county.

Mr. Ekerson is always interested in assisting home owners with their repairing problems and features time payments for remodeling.

The Ekerson store contracts for any size paint or roof job and features the famous Pabco products.

LEAKY ROOFS NOW OUT OF DATE!

No more need for leaking roofs and costly repairs. New roofing methods and materials, just recently developed, are your guarantee against leakage. Roofing manufacturers claim that pre-marketing tests show that the latest discoveries will save consumers millions of dollars annually in repairs. Home owners are advised to take advantage of this opportunity to re-roof now while prices are low, as the ascending cost of raw materials will soon show itself in a marked upswing in prices.

The Federal Housing Authority now is financing roofing and roofing repairs. Government loans can be repaid over a long period of time and carry low interest rates. Your roofing contractor can supply you with an FHA loan application. Any home-owner may secure one of these loans.

Continuous, Consistent Service

For more than 25 years this company has been supplying the building needs of this community.

Continuous service, complete and adequate to Ashland and vicinity.

Consistent service—though long established we have kept abreast of the times with the newest and best of building materials. Gathered here for your convenience you will find the finest quality of locally produced lumber and other materials, combined with products from other parts of our great country where the best in their line is made. Prices at our yard are always consistent with value.
