Positions Open Under Civil Service Exams

Civil service examinations for the positions described below were announced by the United States civil service commission today. Applications will be accepted at the commission's Washington office not later than the closing dates specified. The salaries are subject to a three and one-half percent retirement deduction. Research chemist, any specialized branch, with salaries ranging from \$2,600 to \$5,600 a year. Completion of a four-year college course with major study in chemistry or chemical engineering is required, as well as responsible professional experience in chemical investigative work. Qualified persons with experience involving use of recently developed specialized techniques in chemical research are urged to apply at once. Applications will be rated as received until Dec. 31, 1941.

Associate entomologist in taxonomy, \$3,200 a year, Bureau of Entomology and Plant Quarantine, department of agriculture. A four-year college course with major study in entomology is required. Applicants must also have completed three years of research experience or of graduate study in the taxonomy of the aculeate Hymenoptera. Applications must be on file not later than April 10, 1941.

Construction inspection coordinator, \$3,800 a year, United States Maritime commission. Applicants may qualify in three optional branches: Hull, machinery and electrical. Practical experience of at least journeyman mechanic grade on the construction of ocean-going vessels is required, as well as four years of experience in supervisory capacity. Applications will be rated as received until further notice.

Student nurse, \$288 a year, including quarters, subsistence, laundry and medical attention. Approximately 50 students will be enrolled on Sept. 1, 1941 in the training course at the St. Elizabeths hospital school of nursing, Washington, D. C. Graduation from an accredited high school giving a four-year course which included certain subjects is required. Applicants must have reached their 18th but must not have passed their 30th birthday. Applications must be filed not later than April 7, 1941.

Full information as to the requirements for these examinations may be obtained at the post office.

BASEBALL CALL HEARD AT AHS

Under supervision of Coach Jerry Gastineau, former star pitcher at Willamette university, Ashland high school boys are practicing nightly for the coming baseball season.

Gastineau plans to secure games with several B schools throughout the valley and also may play Medford and Grants Pass. Nothing is expected in the way of a winning team this year, the season being used to build material for next year. It is possible that a league between Medford, Ashland, Grants Pass and possibly Klamath Falls will be formed for next season.

Only two seniors, Ivan Randles and Bob Weaver, have reported for practice. Others are Bill Elam, John Bell, Bud Provost, Chet Fowler, Dale Adams, Bill Haines, John McCollum, Dick Grubb, Phil Willis, Lorence Barger, Theibert Tucker, Dick Finner, Charlie Jandreau, Neil Arant, Barney Riggs, Owen Griffith, Marvin Gettling and Delbert Landing.

NEWS FROM

Lincoln School

By SCHOOL STUDENTS The sixth grade in social studies gave a series of reports on Germany. They were divided into four groups: history, farming, manufacturing and transportation. In their study, they used glass slides and film strips showing pictures of the country. They also used the balopticon which reflects pictures on a screen. It is better than glass slides or film strips because any kind of pictures can be used.

In art, the children are making a mural. It will show different scenes in central Europe. The scenes will be in Holland, Austria, Switzerland, Czechoslovakia and Germany.

Miss Ady, the college art teacher, told the children about German art. It was very interesting. Miss Hales told them about her trip to Europe.

Walter Walker is a new boy in the fourth grade at Lincoln school. He came on March 1 from the Jackson school in Medford. The boys and girls of room five are very glad to have Walter with them.

Alta Mae Johnstone brought a turtle shell to show the second grade Wednesday.

Store Pills Hit By Food Specialists

Much of the \$100,000,000 spent each year for "drugstore vitamins" could far more profitably be used for improving the diet by the addition of foods that supply both vitamins and other food elements, according to nutrition specialists who took part in the 11th annual home interests conference held at the Oregon State college.

The current craze for obtaining vitamins in pills was discussed at length and it was generally agreed that this causes a waste of money at best, and frequently does not accomplish the end sought. There are now at least 20 different vitamins known to science, and all are necessary in the diet in varying amounts. Ten of these are now obtainable in pure form.

One speaker pointed to the absurdity of anyone expecting to supply himself with the proper amounts of all of these in pill form. Even nutrition specialists do not yet know how much of the various vitamins is needed, nor to what extent excessive amounts of some may be harmful.

Certainly vitamin concentrates are not a substitute for a good diet, and it further was agreed that those whose diets are deficient are the least able to purchase the rather expensive vitamin concentrates. All the speakers on this subject agreed that the concentrated vitamins are a valuable addition to modern life for use in research and for the prevention or cure of certain well-defined deficiency diseases.

They also are valuable for use with the diets of infants or young children under many conditions. In all such cases, however, the vitamins are properly given under the direction or advice of a physician, or at least one well trained in the field of nutrition.

Where used as a "shotgun prescription for what ails you" vitamin concentrates are little better than the old patent medicines even though highly valuable when properly used, it was said. Many of the conditions they are used to cure could easily have been prevented by wise selection of food, it was agreed.

START TRACK SEASON

About 40 boys have reported to Coach Leighton Blake in answer to his call for track material at Ashland high. The boys are working out every night at the SOCE athletic field pending completion of track facilities at Walter Phillips field. An effort will be made to secure the city bulldozer to make the college field fit for further track practice and Blake is trying to secure meets for his charges.

After spending the past three months in Los Angeles, Mr. and Mrs. H. O. Butterfield have returned to their home in Ashland.

JANDREAU ON ALL-STAR TEAM

Charlie Jandreau, little forward with the Ashland Grizzlies, was the only Ashlander making the first team on the all-star quintet recently picked by votes of coaches and sports writers in Roseburg, Grants Pass, Medford and Ashland.

First team selections are Jandreau, Ashland and Fred Gunnette, Medford, forwards; Hank Herman, Medford, center; Jim Findlay, Roseburg, and Harold Fawcett, Medford, guards.

Second team positions went to Bud Provost, Ashland and Earl Wiard, Roseburg, forwards; Roy-al Denton, Roseburg, center, and Johnny Gray, Grants Pass and Bob Weaver, Ashland, guards.

Honorable mention was given Jim Smith, Ashland and Bill Wall, Medford, centers, and Bill Reed, Medford, forward.

Those casting votes were Jerry Gastineau and Larry Hunter, Ashland; Russell Acheson and Bill Hulén, Medford; George Hibbard and Roy Sheedy, Grants Pass, and Jim Watts and Hap Applegate, Roseburg.

New S. P. Equipment To Cost 20 Millions

A \$20,000,000 expenditure for new locomotives and freight cars has just been announced by A. D. McDonald, president of the Southern Pacific company.

This outlay, McDonald pointed out, is in addition to the purchase of 40 diesel-electric switching engines, at a cost of \$2,900,000 since the first of the year.

The current expansion program includes orders for 40 of Southern Pacific's unique cab-ahead steam locomotives, among the heaviest and most powerful in the world, and for 10 steam streamlined locomotives of the famous Daylight type, at a total cost of about \$11,000,000. It also provides for approximately 2500 freight cars costing about \$9,000,000.

"These important additions of new equipment are being made for the primary purpose of keeping pace with current increase in transportation requirements due to national defense and of anticipating the increases yet to come as the defense program develops," McDonald said.

"Since the early 1920's the railroads have spent approximately 10 billion dollars for plant improvements. Stronger tracks now carry locomotives of greater power, hauling at greater speeds longer trains of cars of greater capacity, so that the efficiency of the railroads, as measured by tons of freight carried one mile by the average train per hour, has increased about 80 percent since 1921."
