"THE TRUTH WILL SET YOU FREE"

Use That Ash Tray!

Thus far this season the Oregon public has set a record in the reduction of man-caused forest fires, but now with most Oregon roads bordered by a heavy crop of dry grass, it is doubly important that the motorist keep in mind the fire hazard.

State Forester N. S. Rogers recently said, "If motorists would stop flipping cigarettes and other lighted objects from their cars, the cost of forest fire suppression in this state would be cut approximately one-third."

This is a simple, forthright statement by a man who ought to know what he is talking about, for suppressing forest fires is part of his job. Naturally, he would prefer that forest fires didn't start. We now are coming into the worst half of another fire season and our forest roads are carrying more tourists than ever. And we like tourists even though they do have a bad habit of tossing any old thing out of their car windows—plain rubbish is bad enough, but lighted objects are a crime.

So, Mr. Motorist, why not use that ash tray so conveniently located in your car and prevent a repetition of the hundreds of fires caused in Oregon last year by careless motorists.

Time to Save!

As banking authorities are pointing out, saving on the part of the public is especially important now.

Saving does two things, both of which are desirable and necessary. First, it builds up a backlog for the future when the defense program will be over and we will have to return to some sort of normal basis of living.

Second, it diverts money from the consumer goods markets—and that, in turn, helps build up the stocks of materials needed for military preparedness.

Today the government is urging the people to purchase the special defense bonds and stamps newly issued by the treasury. The banks of America, knowing full well the gravity of our economic problems, are co-operating fully in this endeavor, without a nickel of profit to themselves. When we loan to the government, we are directly aiding defense, we are investing in the safest known form of security, and we are helping fight inflation.

Every family should make defense bond purchases an integral part of its budget for as long as the emergency endures. Buy as many bonds as you can. And don't dispose of them unless it is absolutely unavoidable.

Rail oddities

REDUCING THE AVERAGE "TURN-AROUND" TIME OF EACH RAILROAD FREIGHT CAR ONE DAY, BY FASTER UNLOADING, ADDS TO THE NATION'S FREIGHT CAR SUPPLY THE EQUIVALENT OF 97,600 CARS.

THE 600 BILLION GALLONS OF WATER USED BY THE AMERICAN RAILROADS EACH YEAR, WOULD FILL A CHANNEL 600 FEET WIDE AND 9 FEET DEEP, REACHING FROM NEW YORK TO SAN FRANCISCO.

PIONEER RAILROAD BUILDERS IN THE WEST WERE ATTACKED FREQUENTLY BY INDIANS. AS LATE AS 1883 THIRTEEN RAILROAD SURVEYORS WERE MASSACRED BY APACHE INDIANS.

TALENT NEWS

● Mr. and Mrs. C. W. Moore returned home Monday from a 10-day visit in southern California, where they visited a son and family.
