● Gordon Grow returned Friday from Portland where he had gone to take physical examination for U. S. army service. He was unable to pass the examination.

NEWS FROM

Lincoln School By SCHOOL PUPILS

The children in Room 2 had a parrot in their room. Mr. Henry Miller brought it to school. He had had it four months. The parrot is about 50 years old. It could climb chairs. Miss Stockard made a perch for it to stand on.

On Friday, April 10, Mr. Henry Miller, a student teacher of Room 6, brought his parrot into Room 5. He could not make it talk. Mr. Miller gave the parrot a spoon with a little bite of jelly in it. The parrot took the spoon in his beak and then put it in his right foot and ate from the spoon.

James Rose of Room 8 is in the hospital where he had his appendix removed. He will be absent for about two weeks. The boys and girls are very sorry he is out of school.

The children in Room 3 have a wild flower chart. It tells the date, the name of the flower and the name of the child who brought each one. The children who live on the hills find a great many wild flowers.

Mary Elliott made a garden song. She sang a tune to it. Miss Landen wrote the music to the song on the blackboard as Mary sang it. The song was very pretty.

Espee Drops Big Sum In State's Coffers

Taxes levied against property of the Southern Pacific company and affiliated interests in Oregon for the first half of 1942 and now paid totaled \$745,281.70 or 3.06 per cent of all taxes levied in the state, the company has reported.

For all counties, except Multnomah, in which Southern Pacific operates a railroad, it paid 6.58 per cent of all taxes levied. Average tax per mile of main line track was \$535.07.

Largest single assessment was in Lane county where the amount was \$169,146.66 or 11.60 per cent of the county's total. Second largest was in Klamath county where the payment was \$119,070.42 or 12.5 per cent of the total.

Amounts in other counties follow: Benton, \$13,898.29; Clackamas, \$32,987.60; Coos, \$30,377.42; Douglas, \$74,836.55; Jackson, \$52,671.06; Josephine, \$34,064.09; Lincoln, \$10,772.13; Linn, \$31,452.36; Marion, \$56,056.08; Multnomah, \$32,671.15; Polk, \$11,731.10; Tillamook, \$24,989.84; Washington, \$27,433.45; Yamhill, \$15,463.71.

Seeks Fourth District Congressional Seat

Ed Boehnke has been active in the republican party in Lane county and in Oregon for many years. He is a charter member of the Oregon Republican club, served as vice president of the state organization for one term and as the first president of the Lane county chapter of the Oregon Republican club.

Boehnke has won recognition for the way in which he has taken up the cudgel in the interest of home rule and free enterprise for Oregon and the Pacific northwest as against bureaucratic control sought by such men as Ickes, Raver, etc.

Born in Eureka, S. D., March 31, 1894, Boehnke spent his early youth on a homestead in North Dakota. At the age of 12 he began an apprenticeship on a country

newspaper and at the age of 16 was editing the Pettibone, N. D. Spectator. He joined the army in early 1918, serving with Co. H, 139th Infantry, 35th Division, in France where he received citation for having "served with honor" on the battlefields of France.

He came to Eugene in 1922, going to work for the Eugene Guard. In 1926 he bought a printing establishment now well known as the Boehnke Printing company. He is married and has two sons.

Planning Food Supply Helps Year's Needs

Food may be produced without making a plan, but planning helps to assure the family of having the right foods in sufficient quantity, says Mrs. Mabel C. Mack, extension nutritionist, in a new extension leaflet entitled, "Planning your Family's Food Supply."

This bulletin is designed to help the farm and home gardener decide how much of the various types of food to grow and store for a full year's supply. Production of such a year-round food supply will reduce cash expenditures for food, help conserve commercial food stocks, and insure better family nutrition, the author points out.

The pamphlet is issued in the form of a four-page leaflet which can be opened out, making a wall chart on which any family may figure and record the amounts of milk, poultry, meat, vegetables, fruits and some other foods which will be required for that particular family. The chart shows the yearly needs of one person and of the average family of five persons for these various food items. It also shows how much land and live stock is needed to produce such amounts.

ANSWERS

Questions Will Be Found Elsewhere in This Issue

1. Aconcagua, an extinct volcano in the southern Andes. With a height of 23,080 feet, it is the highest mountain in America.
2. The Maoris, primitive inhabitants of New Zealand, belonging to the Polynesian branch of the Malay family. The several hundred years migration ended in 1350.
3. According to geological evidence the Pacific is probably the oldest with the Atlantic being the youngest.
4. Hungary.
5. Appalachian.
6. Toussaint L'Ouverture.
7. The earliest remains of the human habitation in Egypt have been traced back to the Old Stone Age at least beyond 10,000 B. C.

8. Georges Clemenceau, French statesman and journalist.
9. Helena.
10. 8,203,942.

New High in Ship Production

LIBERTY SHIP BEING FITTED OUT AT A BETHLEHEM YARD PREPARATORY TO SEA SERVICE. THE YARD IS PRODUCING A CONTINUOUS STREAM OF VESSELS OF THIS TYPE.

Bethlehem ship production this year will represent the greatest all-round shipbuilding output by any company in the history of the country.

Speed, speed and more speed is the constant objective; and always speed with quality, for a jerry-built ship is virtually useless in the grim tasks of maritime war.

The first Liberty ship which recently discharged supplies at a Red Sea port was built in a yard that was virtually non-existent a year ago. A tanker was delivered in 100 days from laying of keel. A battleship will be delivered 14 months ahead of schedule.

Cargo ships are being built in less than one-half the time

required in the first World War. Comparable speeding up has been achieved on other types of ships and the schedule is being constantly stepped up.

Expanding old yards, building new ones, tripling employment in a year's time, training thousands of new men, putting every effective facility to use, adopting pre-assembly and mass production methods—all these spell tonnage and more tonnage, a steadily-mounting output of ships from Bethlehem yards.

All hands are doing their utmost for Victory, working to achieve the maximum for the U. S. Navy and the U. S. Maritime Commission, so that the "bridge of ships" shall be maintained and steadily enlarged.
