Food Preserving Demonstrated

A demonstration of freezing, drying and canning foods was held at the city hall Monday. Miss Farrell, demonstration agent, was present and had charge of the program. A covered dish luncheon was held at noon. There was a good attendance of ladies present.

there by her two daughters, Mrs. Allen Miller and Mrs. John Kesler of San Diego, Calif. and they all visited with Kenneth Bell who will soon leave with the U. S. navy. Kenneth has just returned from several months service at Pearl Harbor.

HILT NEWS

Red Cross Nursing Class Ends Season

At the final meeting of the Red Cross nursing class last week, under the direction of Mrs. Olive Allison, examinations were taken and passed successfully by all members of the class, which included Mesdames Fred Bayliss, Kenneth Brown, Murwin Bradford, Eldon Bradford, Ray Elliott, Ben Ollom, Frank Onlund, Bill Tallis, Homer Vincent, Russell Harris, Roy Hord, T. Quamme, Enzie Wright, Fred Haynes, Arthur Pedersen, Vernal Nebeker, Frank Ward, Frank Graves and Miss Lucille Gansberg. Refreshments were served after the work was completed, and a treasure hunt was held in the club room, with high prize being won by Mrs.

Kenneth Brown and low by Mrs. H. De Jarnett. Mrs. De Jarnett, Mrs. R. F. Schiappi and Mrs. Florence Clark were guests at the meeting. A lovely gift of appreciation was presented to Mrs. Allison by the class.

Survey of Food Drying in State Shown in Data

A detailed survey just reported on by the food industries department at O. S. C. shows that Oregon has an approximate food drying capacity capable of handling 2390 tons of fresh products per day. Of this total amount the 75 modern type dehydrators can handle about 920 tons per day. The remodeled natural draft driers to which fans have been added can handle about 1020 tons per day, while the old style natural draft driers would have a capacity of only some 460 tons of fresh material per day.

While Oregon's dehydrating plants are well adapted to handling fruit without much additional equipment, their use in drying vegetables is dependent upon availability of such equipment as blanchers, peelers, slicers and shredders, Professor Wiegand asserts. The best opportunity in vegetable dehydration, he believes, lies in a combination of canning plants, which already possess such machinery with nearby dehydration facilities.

At the Churches

TRINITY EPISCOPAL CHURCH
Rev. Claude E. Sayre, Vicar
Holy Communion 8 a. m.
Church school 9:30 a. m.
Sermon and Morning Prayer, 11:00 o'clock.

Subject: Is the Universe, Including Man, Evolved by Atomic Force?
Wednesday evening meeting, which includes testimonies of Christian Science healing, is held at 8 o'clock.
Reading room open daily from 2 to 5 p. m., except Sundays and holidays.
The public is cordially invited to attend these services and to use the reading room.

Much Milk Being Diverted to Cheese

The heavy diversion of America's milk production away from butter and into cheese and evaporated milk is shown in figures recently assembled by the extension office in agricultural economics at Oregon State college.
Figures for the first quarter of 1942 show 186 million pounds of cheese manufactured compared to 129 million pounds for the comparable quarter in 1941. This increase of 66 million pounds means that 680 million pounds more milk went into cheese production in the first three months of this year than last.

"Edith," he whispered, "will you marry me?"
"I don't know, Tom," she replied coyly.
"Well, when you find out," he said rising, "send me word will you? I shall be at Eva Gordon's until ten o'clock. If I don't hear from you by then I am going to ask her."

Soldiers of Production
America's "soldiers of production," men and women working in the plants of American industry, have their uniforms, too. Some uniforms worn by G-E workers on vital production jobs are shown below.
1. Not a gas mask, but a special nose mask to guard his breathing, is worn by this spray painter at his job in one of the General Electric plants.
2. Like a man from Mars, the "cold room" research man is a strange sight as he tests airplane instruments for high-altitude performance in a G-E laboratory.
3. Frankenstein? No, just another G-E worker. His job is sandblasting big turbine castings for Uncle Sam's ships at one of the General Electric plants.
4. The helmet he wears is to protect him from light! The rays from a welder's arc could cause blindness if he did not wear this strange headgear.
General Electric believes that its first duty as a good citizen is to be a good soldier.

Guetzlaff Elected To School Board

At the annual school meeting Monday night Ted Guetzlaff was elected director for three years. Mrs. Anderson was reelected clerk and the budget of \$5127.50 was passed on.

LINCOLN SUMMER SCHOOL Reported by Upper Grade Pupils

Art in Summer School
Mrs. Dodge and Miss Nicholson have the pre-primary grades. They are working with clay, crayons, chalk and paint.
Miss Hileman's room drew flags for Flag day. They are now making a movie.
The children of Miss King's room, the 4-5-6 grades, are doing quite a bit in art period. They are going to have a puppet show, a mural and a movie with the balloon.

children have brought some of their toys from home. They have a play house in which they play during many parts of the day. In the middle of the morning the children enjoy a lunch period.

Special Reading
In room 8 the boys and girls are having special reading for the summer term. They have come from the third, fourth, fifth and sixth grades. Reading exercises are used every day. The room has many interesting books. The girls have challenged the boys to see how many books they can read. Mr. Wilda made the chart for them. They also have the special subjects of music, art and orchestra.
Upper Grades
The pupils enrolled in the upper grades are enjoying a study of the

navy from its beginning. They have had film slides and glass slides showing development of boats, also a movie on boats. The pupils are planning to give reports to the class when they have completed their reading. Many songs of the sea are being learned.

SUMMER STUDENTS ELECT OFFICERS

At the first student body meeting for the first summer session at the Southern Oregon College of Education the following students were elected to student body offices: Verne Johnston of Medford, president; Mildred Prather of Malin, vice president; Barbara McLean of Klamath Falls, secretary-treasurer; and Bernice Martin of Red Bluff, social chairman.

Intuition: The strange instinct that tells a woman she is right, whether she is or not.

To be a successful American farmer today or in the future, you must have more on the ball than the average American doctor, lawyer or merchant.
What do dictators know about over-crowded living conditions who have never seen growing girls in last year's slacks.
Fireman: "Here's that dollar I borrowed from you last year."
Chief: "You kept it so long that I don't know if it's worth while for me to change my opinion of you just for a dollar."
The years that a woman subtracts from her age are not lost; they are added to the ages of other women.
