

## Hindsight On Sports

By I Told You So

It will be a battle to see who stays out of the cellar tonight at Walter Phillips field when the Medford Black Tornado blows itself across the field against the Ashland Grizzlies. The awful "honor" of last position in the conference will be the award awaiting the loser and, from the exhibition staged against Dunsmuir here Friday, our Grizzlies will know just what that feels like after the clock has ticked away the necessary 48 minutes to complete the game.

Prior to the Dunsmuir game, reports were brought into this department that Ashland was tired of being pushed around the field by other opponents and were hopping mad about their loss to Yreka. If this was true, the Grizzlies cooled down considerably before time to take the field against Dunsmuir. They exhibited no fight and fire necessary to win a ball game. After they scored their first touchdown they let up and got themselves pushed all over the grass by the California club. End runs and off-tackle plays gained considerable yardage against the Tigers, so Quarterback Billy Elam "bashed his brains out", and those of the rest of the backfield, against the center of the Dunsmuir line, their strongest point. Why, we are unable to say. Toward the end of the game Elam filled the air with pass plays, even after it became evident that the ends or backs couldn't get clear to catch the slippery and soggy ball. Why, we are unable to say. The Ashland forward wall held like a sieve all evening, Dunsmuir ripping it to shreds every time they hit it.

We believed the reports brought to us that Ashland's ball club was mad, believed them to the extent that we printed them. Nobody but the spectators who paid "hard-earned money to watch was mad Friday night.

Reports that some of the first string players do not show up for practice until it is sometimes half over, and sometimes not at all, have been brought to us by second and third stringers who we have no reason to doubt. Could it be these boys are out for football merely to fill up a suit and do not have the game's interest, or their team's interest, at heart? Had it not been for Barney Riggs' brilliant playing at backing up the line last Friday night, it would probably have been necessary to have an adding machine to count up Dunsmuir's score. Barney played his heart out all evening, every minute that he was in the game, but he got little or no support from any of the other ten men on his side. On offense, when he and the rest of the ball carriers tried to gain, they got only half-hearted assistance.

Tonight the Ashland Grizzlies, who looked more like lambs than grizzlies against Dunsmuir, play their bitter enemies, the Medford Black Tornados. If Ashland plays the type of ball they played against Dunsmuir, the Tornados will blow them clear out of the field. If they fight and show the fire they showed in the first half of their game with Klamath Falls, we will need our adding machine to keep account of Ashland's score. Who will use our Burrough on tonight rests with the Ashland ball club. What will it be, gang?

Our prediction figures skidded down hill 10 points last week with five out of ten going bad. The figures now stand at 60 games played, 33 won, 27 lost for a season percentage of .550. Being brave, here are ten more for this week:

California over Montana, Alabama to beat Georgia Tech, Washington State easily over Idaho, Southern California to knock over Oregon, Stanford in a close one from Oregon State, Ohio State to defeat Illinois, Notre Dame to get by Michigan, Minnesota to stop Iowa, Navy to win from Columbia, and Medford to beat Ashland.

Members of the Chamber of Commerce' merchants' committee have set Wednesday evening, November 25, as the date for the customary Christmas opening. A program is being planned, which in addition to the usual window displays, include a prize contest to extend from 6 to 10 o'clock that evening.

## Listless Grizzlies Get Whipped Again

Tanks to a soggy field and slippery ball, the Ashland high Grizzlies got off with only a 14 to 9 pasting by Dunsmuir in a non-conference football game played at Walter Phillips field Friday night.

Ashland scored first on a quarterback sneak that saw Billy Elam scamper about 35 yards to pay dirt but Dunsmuir came right back to tie up the score by beating the Ashland line to shreds.

In the second quarter Ashland put Dunsmuir against the goal line on a well-placed punt and a bad pass from center gave the local team a safety which proved to be the last of their scoring for the evening.

Late in the fourth period Dunsmuir shoved across another touchdown to go ahead 14 to 9. Ashland tried desperately to pass the slippery ball in an effort to get again in the lead but bore one of the Ashland receivers could hang on to the ball the final gun sounded to bury the Grizzlies in another defeat.

## Medford Trounces Junior High Eleven

Paced by a backfield boy named Watson, the Medford junior high football team, leader of the southern Oregon conference, took the Ashland junior high apart at Medford last Thursday night to the tune of 52 to 6.

Leon Haynie saved his team from a whitewashing when he broke away and ran about half the length of the field for Ashland's lone touchdown.

## Newton Breaks Arm In Dunsmuir Game

Jack Newton, playing tackle for the AHS football team, suffered a fractured arm late in the fourth quarter of the game with Dunsmuir high school here last Friday night. The accident occurred as Newton was lying on the ground after a play was completed and a Dunsmuir player fell on Newton's upturned arm bending it back enough to fracture it just above the wrist.

This injury adds one more Ashland player who is out for the season, Ken Caton suffering a thigh injury in the Yreka game which has had him hospitalized.

Smith, Dunsmuir captain, re-broken nose in the same game.

## Sausage Dishes 'are rich in'

## VITAMIN B

Dorothy Greig  
IT'S always wonderful to discover that a dish that's good for us is a pleasure treat, too. Like these sausage pies, for instance. Pork, the nutrition experts tell us, is one of our richest sources of Vitamin B, the vitamin that helps keep morale high and nerves steady. It's an important vitamin indeed in these war wracked days.

That's why our little pork sausage pies are good for us. But when we bite through their tender biscuit crust we'll probably forget that and enjoy them for the delicious morsels they are. With them we serve a smooth and lavish mushroom sauce made of condensed cream of mushroom soup.

**Individual Sausage Pies with Mushroom Sauce**  
1 pound sausage  
4 cups prepared biscuit flour  
1 cup milk (approximately)  
Shape the sausage into flat individual cakes, then cook slowly until browned on both sides, but not thoroughly cooked because sausage will continue cooking in oven.  
Mix the milk with the prepared biscuit flour, roll out 1/4 inch thick. Cut with round cutter about 4 inches in diameter. Place sausage cakes on the dough, brush edges of dough with milk. Cover each sausage with second piece of dough which has been perforated so steam may escape. Press edges together and bake in a hot oven, 450° F., for 10-15 minutes or until golden brown. Serves 6-8.

**The Sauce:**  
1 can condensed cream of mushroom soup  
1/2 cup milk  
Stir the milk into the cream of mushroom soup. Heat and serve over the Sausage Pies. Makes 1 1/2 cups.

## HE WHO LAUGHS----LASTS!

**CUPID WAS BUSY—**  
County Clerk Carter issued 93 marriage licenses in October, an all-time record. About 75 per cent of the licenses issued are to Soldiers and their brides.

**RETURN HOME—**  
Mr. and Mrs. William Loughlin left Ashland Saturday for their home in San Luis Obispo after spending several days here on business.

**HOUSING PROJECT—**  
A 125-unit housing project for civilian workers at Camp White has been approved by the National Housing Agency.

Kenneth C. Hoffman passed through here Sunday enroute to his home in Portland where he will visit his mother for a few days before leaving for the war zones somewhere. "Ken" joined the Navy some months ago at San Diego.

**DIES IN OAKLAND—**  
Frank Hibbs and other near relatives were called to Oakland last Wednesday by the death of his brother M. I. Hibbs, who died November 4 in Oakland of heart trouble. Deceased was a former resident of Ashland.

**RURAL SCRAP DRIVE—**  
A rural scrap drive is slated for November 15 when all 36 counties of the state are asked to participate in a final push to put Oregon over the top of its 100,000-ton quota. The quota period ends January 1st, 1943.

**SCORES PAST WEEK—**  
Dunsmuir 14—Ashland 9  
Medford JHS 52—Ashland JHS 6  
Klamath Wildcats 20—Ashland reserves 0.

**GAMES THIS WEEK—**  
Medford JHS at Ashland JHS, (Tues.)  
Medford at Ashland (Fri.)

## The Unexploded Bomb, No. 1

**EDITOR'S NOTE:** Tonight, tomorrow or any time in the near future this city and your home may be bombed. When enemy planes come over, you may expect to hear the crash of high explosive bombs and see fires started by incendiaries.

But do you know that after the enemy planes have been shot down or have flown away, the raid may go on, and on, for hours or even days? The bomb dropped today or tonight may not explode until next week. These are unexploded bombs, the U X B's, perhaps the most devastating and dangerous of all weapons of warfare.

We present here the first of a series of articles, authorized by the U. S. Office of Civilian Defense for the Ninth Civilian Defense Region, to acquaint you with the UXB and your responsibility in helping to protect yourself, your family and your city: Most of the bombs which whistle down on this city when enemy planes fly overhead will explode with the accompanying destruction for which they were designed.

But some of them will crash through buildings, paved streets and factories or bury themselves deep in the earth. These are known as unexploded bombs, or UXB's, to the military and civilian defense officials who have to deal with them.

UXB's are divided into two types, time bombs which are set to explode hours or days after plowing their way into the ground, or bombs in which the detonating device has at least momentarily failed to work.

Sometimes these unexploded bombs are cleverly placed by the enemy where they are calculated to do the most damage possible. One may be dropped in a railroad switch yard or in the midst

of a factory which is working around the clock on war production.

It would be bad enough if the bomb actually exploded on impact. It's worse when it doesn't, because activity in the immediate area of the UXB must cease until the bomb has been rendered harmless and removed. Other districts, which likewise must be evacuated until the bomb is removed. This disruption of civil life and of national production facilities makes the UXB the most dangerous and devastating of war weapons.

No one knows or can tell when the unexploded bomb will go off. And until it has either exploded or been removed the air raid is, in effect, still on. Unexploded bombs planted throughout the city are just as dangerous to you and your family, to our production for war as if squadrons of enemy planes still flew overhead.

The Western Defense Command and Fourth Army, the Ninth Regional U. S. Office of Civilian Defense and your Civilian Defense Council have developed a simple reporting and operating system on the West Coast to defend you against these death dealing instruments of war.

In this system you, too, have a function, and a very vital one. In subsequent articles on the UXB we will tell you about this system of rendering inactive the enemy's most dangerous weapon and where your responsibility lies in this method of defense.

**KILLED BY LIGHT WIRE—**  
Gerald E. Kendall, aged 38, a city employe, was electrocuted in Medford Sunday by a falling light from a city street.

## THANKSGIVING REHEARSAL

CHICAGO, ILL. — "Priscilla" and "John Alden" rehearse for the annual Thanksgiving party at which Walter E. Olson, president, presents the employes of his rug company with 10,000 pounds of turkey.

## Ev'rybody Ev'ry Pay Day

6,000,000 Women Enrolled in War Savings Payroll Plan.

WASHINGTON, D. C.—Women At War Week, opening Nov. 22, during which women will seek to sell the greatest single week's volume of War Bonds and Stamps will serve to put the spotlight on the mighty contribution women generally are making toward financing the war.

Six million women are on War Savings payroll plans. Their monthly deductions total \$70,000,000.

The customers of 300,000 newspaper boys who have sold more than \$50,000,000 in War Bonds and Stamps are mostly women.

Volunteer saleswomen run nearly all the Bond booths in theatres from Maine to California. They also are sparking the War Bond sales in retail stores.

Ralph G. Engelsman, Associate Field Director of the payroll savings section of the War Savings Staff, readily admits that without the support of women the phenomenal record of payroll savings enrollments would not have been achieved. Payroll savings plans are now in operation in 148,000 businesses and factories. Employees of twenty-five thousand of these firms are converting at least 10 percent of gross payrolls into War Bonds every payday.

Associate Field Director Engelsman says that women have contributed directly and indirectly toward this record. When a man devoted 10 or more percent of his pay envelope to War bonds, the woman at home has had a powerful voice in the decision. Her planning, her economics and her cheerfulness play their part in the success of payroll savings.

## 'This Is My Fight Too'

Proud of her investment in the American way of life and equally proud of the grime of war production on her face and arms, the young lady in this "Women At War Week" poster symbolizes two of the chief activities of women at war.

## On the Seven Seas

For 45 years General Electric has developed and built electric equipment for warships. Here are a few of the ways in which electricity serves the Navy.

1. Just one battleship may have electric generators to produce as much as 180,000 kilowatts. This power would supply the needs of a city of 375,000.

2. Searchlights produce millions of candlepower of light to aid in detecting enemy ships and planes, and to guide Navy gunners to their targets.

3. More than 20 different operations are performed in bringing a naval gun to bear on its target. Electricity helps to co-ordinate these operations.

4. When a battleship goes into action, electricity helps direct the ship, operate the guns, and give the orders. G.E. is building equipment to do these jobs.

General Electric believes that its first duty as a good citizen is to be a good soldier.
