**Washday Short Cuts**

**D**RY and dampen clothes correctly, and you get better results on washday with less time and effort.

Mrs. Kiene

A clothesline made to your height saves stretching. Roll clothes along on a child's express wagon and you avoid unnecessary bending. Fold sheets and tablecloths right side out, hem to hem, and hang so the hem extends over the line 8 to 12 inches, and you prevent dog-eared corners. Hang towels and pillow cases square and they give longer service. Hang shirts by the tail, dresses by the hem, anchor several handkerchiefs, napkins and washcloths with a single clothespin.

Dirty clothespins leave their mark on otherwise clean clothes, and once "in", the dirt is hard to get out. To forestall that, tub pins in warm, soapy water once a month, dry in the sun and store them in a clean bag between washdays.

Dampen clothes with warm water, using a fine sprayer or perforated bottle top if possible. Linens require more moisture than cotton, fussy garments which take longer to iron, more than simple ones. Stack handkerchiefs and sprinkle every third one.

Sheets require very little moisture. Roll them dry on the outside and pack in lightly among other sprinkled clothes. That speeds up ironing, because there is no moisture in the body of the sheet to be ironed out, yet the hems absorb enough to make a smooth, presentable turn-back.

**MENU**

- \*Hot Cheese - Tomato Sandwich
  - Scalloped Corn
  - Cabbage Slaw with Sour Cream Dressing
  - Whole Wheat Biscuits
  - Butter
  - Raisin Pie Supreme
  - Cereal Drink
  - Milk
  - \*Hot Cheese - Tomato Sandwich Recipe
  - 1/2 cup cottage cheese
  - 2 tablespoons enriched all-purpose flour
  - 6 slices buttered toast
  - 1 teaspoon salt
  - 2 tablespoons butter
  - 1 No. 2 can tomatoes
- Spread cottage cheese between slices of buttered toast. Cut sandwiches in half. Arrange in buttered shallow baking dish. Melt butter over low heat, add flour and salt. Blend well, add tomato pulp gradually, stirring constantly until thick and smooth. Pour over sandwiches and bake for 15 - 20 minutes in preheated 350° oven. Serves 6.

**WAAC Seek Linguists**

Women familiar with foreign languages are being sought for enrollment in the women's army auxiliary corps for assignment to cryptography, communications and related duties, according to Colonel J. J. Fulmer, commander of WAAC recruiting for Oregon.

In announcing the new war department directive authorizing the enrollment of linguists for service with the WAAC, the colonel stressed the important need for women with a knowledge of Spanish, Portuguese, Chinese, Japanese, Russian, French, German and Italian and urged all qualified women to apply for enrollment immediately.

He added that applicants would be required to submit a certified letter from at least one responsible person outlining their qualifications at the time of their enrollment. Other pre-requisites for enrollment require that applicants between the ages of 21 and 44 inclusive, be of good moral character and in good physical condition. Applicants need not have a high school education but are required to pass a mental test to prove their aptitude for service.

Besides these specialists, thousands of other women are needed for training in non-combatant duties with the WAAC at home

**NEW ELECTRICAL CONNECTIONS TO FARMS PERMITTED**

Revised WPB regulations will make it possible for many Oregon farms to have the use of electricity to assist in livestock, dairy and poultry production, the state USDA war board has announced.

The new regulations provide for electric connections to farms needing power to operate production equipment and whose 1943 livestock production will total at least 10 annual units.

Applications to power companies or REA co-ops for new connections must be accompanied by certification from the county USDA war board that the connection will result in an increase in farm production or a saving in farm labor.

The length of new connections may be as much as 100 feet per animal unit, but not to exceed 5000 feet. A milk cow is rated as one animal unit. Equivalents include 10 head of cattle other than milk cows or feeders; 30 breeding ewes, 3 brood sows, 75 laying hens, 40 turkeys or geese, 20 cattle in feed lot, 160 lambs in feed lot, 30 feeder pigs, 600 broiler chickens or 250 chickens raised other than broilers.

The WPB order specifies that the applicant for a connection must have on hand or be able to get without priorities one of the following types of electric equipment: Water pump for livestock milking machine, feed grinder, milk cooler, incubator, brooder, or feed grinder.

Farmers who believe they can qualify for a connection under the revised regulations are advised to consult their local power company, REA co-op, or the county war board.

and abroad. All qualified women are urged to write or visit headquarters, 614 S. Eleventh avenue, Portland, for complete information on the women's army.

Very few people are good economists of their fortune, and still fewer of their time.—Chesterfield.

THE HEART DOES NOT PURIFY THE BLOOD

In spite of the study of physiology and hygiene in all our schools, many people still believe that the heart has something to do with the purifying of the blood. The truth is that the heart is merely a mechanical pump to keep the blood circulation going. It is chiefly in the lungs and kidneys that the blood is purified. If the heart should stop beating the blood circulation would cease, and the waste products in the bloodstream would become sufficient to stop the whole process of life in the body.

**Food Distribution Orders Explained**

Effects upon consumers of Food Distribution Orders recently issued by Secretary of Agriculture Wickard have been explained by Merritt A. Clevenger, Pacific Region Administrator for the Food Distribution Administration.

Of Order No. 1, recommended by the Nation's baking industry, Clevenger said, "Although consumers will have to slice their own bread to bring about economies in bread handling necessary to prevent a price rise, they will be benefited nutritionally by the enrichment of all white bread with essential minerals and vitamins."

"The second order directs manufacturers who produce more than 12,000 pounds of butter in any month to set aside 30 percent for direct war requirements. More than two-thirds of this will go to U. S. armed forces. Men in our armed forces are now eating five times the amount of butter they consumed in civilian life."

"Order No. 3, said Clevenger, "is an attempt to assure adequate supplies of citrus juices for direct war requirements, and to time distribution of civilian supplies so that canned grapefruit juice will be available when fresh supplies are seasonably low. About half of the canned grapefruit juice supply only will be available to consumers. All other citrus fruits will have to be consumed in their fresh form."

Clevenger stated that Order No. 4, an allocation on 1942 Burley tobacco will have no appreciable effect on consumer supplies but would provide for orderly conditions on Burley tobacco auction markets.

"The fifth order," he said, places restrictions on the sale of packaged chicory (used in coffee) to insure adequate supply and efficient distribution.

"Order No. 6 is another on citrus fruits, which sets aside quantities of fresh fruit for processing into citrus juices and other citrus products, so these will be available in sufficient supply for war needs."

"Order No. 7 on raw sugar will likewise have no effect on consumer supply, but transfers authority from WPB to FDA and places restrictions on sugar refiners."

"The ice cream industry is affected by Order No. 8, designed to put more milk nutrients into essential war foods. Ice cream manufacturers have been ordered to cut down their use of milk

**Oregon State to Play Idaho Friday**

Corvallis—Following its return home from the Inland Empire trip, Oregon State's basketball team will play Idaho at Corvallis Friday and Saturday nights in the final game of the season between the two clubs.

In the opening series at Moscow last week end the surprisingly strong Vandals split two contests with the Beavers, losing the first by a score of 52 to 49 and coming back the second night for a smashing 56 to 44 upset to win. The Orangemen had to come from behind in the last minute of play to win the first game.

However, Oregon State was without the services of its leading point maker and floor leader, Don Durdan, in the initial series with the Vandals. The Orange ace was left at home in the college infirmary with the chickenpox but will be ready to play this week end. The Beavers' defense fell off noticeably without Durdan to lead it.

Chief problem of the Beavers in the coming Idaho series is how to stop Fred Quinn, high scoring Vandal center. Quinn was a constant headache to the Orangemen in the Moscow games, scoring 27 points in the first and 17 in the second for a total of 44 points. Another Vandal that the Beavers will have to watch is forward Bob Ryan who made 23 points in the two games last week.

Pleasing to Coach Slat's Gill and Orange hoop fans was the showing of the three freshmen, Bill Tait, Tom Holman and Alex Petersen, on the Inland Empire road trip. All three turned in creditable performances and much needed reserve strength. Tait started the second Idaho game and got seven points.

In this weekend's games Gill will start Glen Warren and Don Cecil at forwards; Andy Anderson at center; and Lew Beck and Don Durdan at the guard posts.

and milk products for civilian production to 65 percent of the amounts consumed from December 1, 1941, to November 30, 1942. This order, effective February 1, should make more milk available for production of needed dairy products, particularly butter."

What is meant by redeeming time? It is to fill the hours full of the rightest freight, to fill them with the life of thought, feeling, action, as they pass.—Clarke.
