

You might as well Confess!

Almost everyone likes a mystery—almost everyone enjoys the thrilling excitement of tracking down a criminal with an ace detective. But some are a little ashamed to admit reading mysteries. Well—you needn't be. Maybe you didn't know that many college professors, bank presidents, great scientists, cap-

Ellery Queen's Mystery Magazine

Edited by Ellery Queen, famous detective of the radio, the movies, and best-seller books, it is devoted exclusively to the best in detective crime short-story literature. And we mean literature. The fact that a story owes its plot to crime and detection need not prevent its being well written. Sohrst detective fiction that is well written is not too readily available. But we are finding them—in books, in magazines, in the files of famous authors—and by arrangement with other publishers as well as with authors, we reprint in the approved Reader's Digest manner the best detective fiction to be procured.

Such masters as Dashiell Hammett, Agatha Christie, Stuart

Palmer and Ellery Queen are to be found in it. But stories are selected on their merits, not on authors' names. Tough and suave, casual and swift, comic and tragic, they are mingled with refreshing variety and stimulating change of pace. Rare gems, fit for the most critical, delightful to the most naive. You will find the new magazine well printed—sharp and clear, kind to the eyes. You will find the size—same as the Reader's Digest—convenient to hold, to handle, to slip into your pocket. You will find the contents the most satisfying quarter's worth of good entertainment you have found in many a day. On sale at all good newsstands—25c a copy.

Paper wrappings substituted for lead foil on cigarettes, smoking and chewing tobacco, have saved 40 million pounds of foil. Continued aeronautical research and constant checks in battle areas have resulted in some 400 improvements in Flying Fortresses.

WAVES Recruiting In Medford Area

New openings in the WAVES, women's service of the U. S. Navy, for women with experience, training or aptitude in more than 80 civilian occupations will be outlined in interviews with applicants by Yeoman Dorothy Duncan, from the Portland branch, Office of Naval Officer Procurement, WAVES Enlistment Headquarters in Oregon, in a week's visit in the Medford area, from August 9 to August 14, inclusive, it was announced here today by Recruiting Specialist Herbert W. Crain, in charge of the U. S. Navy Recruiting Substation in Medford, which handles applications of WAVES in this area.

To assist young women here in making application for enlistment in the WAVES, Yeoman Duncan will be at the U. S. Navy Recruiting Substation in the U. S. Post Office Building in Medford from 8 a. m. to 5 p. m. daily.

For the special convenience of young women who are working through the day, Yeoman Duncan will be available for interviews at night. Appointments can be made for night discussions by telephoning or calling at the U. S. Navy Recruiting Substation in Medford.

Any young woman between 20 and 36 years of age, who is in normal health, has no dependents under 18 years, has had at least two years of high school and who is a U. S. citizen, is eligible for enlistment in the WAVES. If she has had experience in any one of 80 different civilian occupations, she has the proper professional qualifications for enlistment.

Physical requirements have been relaxed recently. Vision, height, weight, teeth requirements have been substantially liberalized.

The success of the WAVES program recently caused the opening of many new billets in the U. S. Navy's famed hospital corps, the latest addition to the growing list of Navy activities in which WAVES are finding an important place. For women with experience as doctor or dental assistants, as practical nurses, as laboratory technicians, or with aptitude for nursing or laboratory work, this new Navy activity offers an opportunity for excellent training in U. S. naval hospitals.

First step in training a WAVE enlistee to replace a U. S. Navy man for service at sea is the intensive indoctrination training at Hunter's College, Columbia University, New York City. She completes this training within a month and is then sent either to an advanced school at one of the nation's leading colleges for specialized instruction or to a U. S. naval station for active duty. She receives her WAVES uniform at the New York College, with the \$200 allowance providing her with complete sets of uniforms. The lowest monthly income of any WAVE is \$132.50, including allowances. Many WAVES finish their training as petty officers, third class, with a monthly income of \$160.50, including all allowances.

"The WAVES organization offers young women the greatest opportunity for war service in the history of our country," said Specialist Crain. "In addition to handling an important and vital job for the war effort, they actually multiply the effectiveness of the

COAST GOVERNORS NAME AWS WEEK

The Governors of Oregon, Washington and California during the past week set aside the week of August 1 to 7 in their three states as Aircraft Warning Service Week. The purpose of this week will be to recognize the efforts of the members of the Ground Observer Corps and the Aircraft Warning Corps of the IV Fighter Command. Following the meeting at the State House in Salem, attended by Gov. Snell, William Fordyce, state liaison officer for the the Aircraft Warning Service, and Jerrold Owen, head of the State Civilian Defense Office, the Governor stated that he was issuing the message designating Aircraft Warning Service Week.

In California, the State War Council met in Sacramento with Gov. Earl Warren and heartily endorsed the proclamation by the Governor of California. A similar announcement was made by Gov. Langlie in Olympia.

Many activities are being planned during the first week of August to pay homage to the many thousands of Pacific Coast men and women who have given much of their time, so that the entire Pacific Coast may carry on their active part in the war effort with a minimum of inconvenience. Due to the efforts of the members of the Ground Observer Corps and the Aircraft Warning Corps, our citizens have been able to sleep without fear of sudden and unexpected raids, and to carry on their daily activities, confident that they shall have sufficient warning in case of any immediate attack.

U. S. Navy because they release men grooved to desks and other jobs for active sea duty, for which they are best qualified."

Yeoman Duncan was secretary to the general manager of Lippman Wolfe & Co. in Portland before enlisting in the WAVES. Yeoman Duncan received her indoctrination training at the WAVES yeomen's school at Oklahoma A. & M. College at Stillwater, Okla., from which she was graduated as a petty officer, third class. She reported to the Portland branch, Office of Naval Officer Procurement, 1233 American Bank Building, Portland, for her first tour of active duty. This office handles enlistments of WAVES in Oregon, Southwestern Washington and Idaho. Yeoman Duncan has established an outstanding record in recruiting work.

Office hours for Yeoman Duncan's visit will be from 8 a. m. to 5 p. m. daily at the U. S. Navy Recruiting Substation in the U. S. Post Office Building in Medford, with appointments at night available for women who are working through the day hours.

PUBLIC DISCUSSION OF RADAR CAUSING CONCERN

The extent of current public discussion of radar is causing increasing concern to the government.

The principle of radar is generally understood here and abroad, and some limited disclosures have been made officially. New methods of applying the principle are being developed, however, and there is much the enemy does not know.

The fact of prior publication should not be used to cover added description, discussion and deduction or to support a theory or draw a conclusion.

Radar is a secret weapon within the meaning of the code. Editors and broadcasters are especially requested to be alert to every mention of radar and military electronic devices; to establish beyond all question that there is appropriate authority for every statement made; and to submit all material on the subject—other than that released by appropriate government authority—to the Office of Censorship for review in advance of publication or broadcast.

So inclusive a request would not be made if the highest considerations of national security were not directly involved.

EFFICIENT SPLENDOR FOR BUSY GOVERNMENT GIRLS

LUXURY DESCRIBES ARLINGTON FARMS—The \$7,500,000 residence halls project designed to become home for thousands of Government girls newly-arrived in Washington, D. C., employ every modern discovery of construction, including weather-, fire- and wear-resistant Cemesto wall units add safety and comfort to the luxurious surroundings of these beautiful homes for feminine workers. Pictured above is the architect's sketch of a typical entrance portico, with Cemesto exterior walls and wide windows for the reading rooms on each side.

Capital Welcomes Newcomers

WASHINGTON, D. C.—The pathetic little creature who would wander from rooming place to rooming place before finding a suitable location in which to live in Washington fast is being replaced by a self-assured, confident young woman who knows that her living problems are being solved by the Federal Government. Today, the Public Buildings Administration of the Federal Works Agency is completing a \$7,500,000 building project schedule intended to house between six thousand and seven thousand new government workers who now will be eligible for residence in these new-type hostels.

To be eligible for rooms in such attractive residence projects as Arlington Farms, applicants must be either newcomers to Washington or must have come to Washington after July, 1941. It is assumed, by Governmental authorities, that those women workers who have been in Washington before July, 1941 already have found suitable lodgings.

Monthly rentals for single rooms are fixed at \$24.50 and range from \$16.50 to \$24.50 per person for double rooms. And you get more than just sleeping accommodations in these Cemesto-constructed buildings. Each tenant is entitled to the infirmary facilities and health service provided by the United States Public Health Service in case of emergency and minor ailments. In addition, there are gymnasiums, dining rooms, tennis and other play courts.

A standard single room is eight by ten feet and is equipped with closet, chest of drawers, make-up cabinet, easy chair, ottoman, lounge-bed, reading lamp, rug, Venetian blinds, with light controls, decorative drapes, sliding blackout panels.

The strong Cemesto-board construction permits of twenty-one different combinations of color schemes, adapted for restful atmosphere and assurance of comfort and ease.

Celotex's Cemesto wall units are being installed in the Dormitories in accordance with a system of construction of the John B. Pierce Foundation of New York City of which J. F. O'Brien is general manager and Robert L. Davison is director of housing research.
