SCORCHED COTTONS

If cottons scorch while ironing, this is what Westinghouse home economists recommend: Plunge into cold water immediately and allow to stand 24 hours. By that time the marks will have disappeared.

PRACTICALLY FOOLPROOF

To prevent white sauce from lumping, try this: Don't allow flour and fat to become too hot before adding the milk. Stir about 1/2 cup of milk in very slowly as sauce thickens, then gradually add the balance of the milk and stir until it all thickens.

GIFT HOLLY SHIPMENTS DO NOT NEED INSPECTION

As a pre-holiday season reminder, the state department of agriculture this week pointed out that gift shipments of cut holly do not need to be inspected or certified before shipment is made. Neither do gift shippers of Christmas trees and other cut greenery, such as salal, huckleberry, fir and cedar boughs, need to worry about inspection, for none is required.

Commercial shipments of cut holly come under the nursery-men's law and require a license, as well as inspection and certification. Commercial shipments of holly are considered to be those of holly commercially grown for purposes of sale or gathered by dealers from home owners.

ELECT THREE NEW MEMBERS

Lois Richmond, Eugene; Loisgae Kruggel, Medford; and Ralph McGinnis of Ashland were chosen to membership in Lambda Chi, literary fraternity at the Southern Oregon College of Education, at a meeting held October 25. Elma Simmons of Eugene was hostess for the meeting.

A Lecture on Christian Science Entitled Christian Science: The Religion of Authority

by Judge Samuel W. Green, C. S. B. of Chicago, Illinois

Member of the Board of Lectureship of The Mother Church, the First Church of Christ, Scientist, in Boston, Massachusetts

The present age is giving birth to much striving and much activity in various parts of the earth where human beings are reaching out, desiring to possess freedom, happiness, more of good. Right thinking people are grateful for this activity of thought, because there is good to be had and enjoyed by all; and activity of thought may open the door for more human beings to a vision of the spiritual and perfect. Christian Science affords any man the opportunity, and provides him with the method of thinking, whereby he may rise above the disappointing experiences of material living and enter into the promised land of spiritual attainments and find his freedom and dominion even the "kingdom of heaven within."

This religious teaching speaks with confidence and with authority because it speaks the message of Christ Jesus and brings the usable and practical knowledge of his ministry to the door of the receptive human consciousness. In all the teaching of the Master there is hope and confidence, with never a note of doubt or fear. The common affairs of men will be on a better basis when more of them, through spiritual attainment and understanding, begin with confidence to claim for themselves health, life, success in business, and happy relations with their fellow beings. That all of this and more may be accomplished through an absolute reliance upon God is the teaching of Christian Science, and the experience of many Christian Scientists.

The Discoverer and Founder

A few years past the middle of the last century, when much of the thought in America was wrestling with the question of human freedom or human slavery, there came to Mary Baker Eddy, the Discoverer and Founder of Christian Science, the consciousness that man has an inherent right to freedom. She had wrestled in her own thought and in her own person with the enslavements of poverty, disease and sorrow. In her striving, she had turned definitely away from the accustomed material means for relieving the pains and heartaches of humanity, and had sought the divine plan of salvation as furnished in the life and work of Jesus of Nazareth.

Christian Science, as discovered and founded by Mrs. Eddy, is not a mere theory, but is a practical and effective elucidation of infinite power that has too long been considered such a mystery as to be beyond the reach of the ordinary thinker and worker. Working out for herself the question of supply, Mrs. Eddy used the teaching and example of Jesus of Nazareth and the works and words of the outstanding characters of the Bible. In her own writings she has given full credit to the Bible and to Christ Jesus for her awakening to the discernment and use of everpresent good.

The Christian Science Textbook

Because of her desire to lead others to the revelation and unfolding that had come to her concerning God and His available power, Mrs. Eddy saw the need of a permanent statement of her discovery. Accordingly, there appeared, as a result of her labors, the Christian Science textbook, "Science and Health with Key to the Scriptures." This book has brought to its readers and students a practicable and understandable concept of God and of Christ Jesus that is enabling men and women to rise quickly and permanently above the errors and pains of the flesh, and the burdens of poverty and sin. This message

is enabling the followers of Christian Science to perceive the true value of the Holy Scriptures, and is making of them able readers of the Bible. The textbook of Christian Science is a real boon to earnest Christians striving to find in the Bible irrefutable evidence of God, enabling the Bible reader to perceive quickly the spiritual import and intent of the Bible, always in the Biblical text the goodness, the perfection, the almightiness of God as Love.

Correct spiritual interpretation of the Bible reveals that God is properly defined and described as Love, Life, Truth, Soul, Mind, Spirit, Principle. Any one of these synonyms, or all of them, studied and pondered, will bring to human consciousness a concept that is flawless, lovable, beautiful, exalting in its satisfaction. Such a concept of God must be had before mankind can be truly obedient to the command to love God. One could scarcely be expected to love and honor a wicked deity, or an unintelligent deity, or an unreliable deity, or an unknown deity.

Christ Jesus, in his ministry as well as in his words, taught the perfection of man, even to claiming his perfect likeness to the Father, God. Jesus' well-known statement, "Be ye therefore perfect, even as your Father which is in heaven is perfect," is held in Christian Science to be mandatory. The Master's conclusion, leaves no intermediate position, or lesser concept of man than the perfect. There is therefore nothing radical or revolutionary in considering in one's every thought the concept of perfect man. Such a concept is authorized by the familiar words in the first chapter of Genesis, that God created man in His own image and likeness.

Christian Science is offering a new chapter in the practical everyday living of humanity with an absolute faith that men can here and now be obedient to the all-time command of the Master, "Be ye therefore perfect, even as your Father which is in heaven is perfect." Compliance with this injunction will bring to men new vistas of thought and accomplishment and a new earth of health, happiness, and contentment, even as is voiced in the words of the Discoverer and Founder of Christian Science (Science and Health, p. 276), "When we learn in Science how to perfect even as our Father in heaven is perfect, thought is turned into new and healthy chan-

Broadcast in Porto Rico Features Oregon

Oregon's tall timber, colorful country and war workers were lauded in a half-hour road program broadcast recently from headquarters of the Antilles Air Command here.

The program was one in the weekly "48-Gun Salute" series which derives its name from the military custom of firing one gun for each state of the union on Independence Day. Each week a different state is honored for the entertainment of the men now serving in the Caribbean area.

Soldier talent and recorded music were utilized to portray memorable scenes and events of the Beaver State still vivid in the minds of men who have been in tropical service for many months.

Making an imaginary flight to the northwest territory, the AAC tour included stops along the Oregon trail to the Columbia River and the Cascade Mountains. Paying tribute to the ship-building industry as well as the other war works related to the vast water power resources of the state, the program also included a view of the salmon industry.

Stops were made at Mount Hood, the Bonneville Dam, Lost Lake and the Pendleton rodeo as well as "City of Roses"—Portland. Moving southward the flight included Grants Pass, Oregon Caves, Klamath Falls, Crater Lake and Lava Cave.

O. F. CARSON

Funeral services for O. F. Carson were held yesterday at the First Baptist Church. Death occurred in San Francisco where he had gone for medical treatment.

He came to Ashland 35 years ago, where he has figured prominently in the business, civic, and church activities of the city.

Survivors include his wife, one son, Verner E. Carson, one sister, Eugenia Carson of Ashland; four brothers, Paul of San Francisco, Rollin N., Leon B., and Robert C. of Los Angeles, California.

The Talent Garden Club met Wednesday afternoon at the home of Mrs. Gertrude Ottinger.

neils,—towards the contemplation of things immortal and away from materiality to the Principle of the universe, including harmonious man."

SOUR MILK
 Stuck with some sour milk? Don't waste it - home economists point out that the food value of sour milk is the same as that of sweet milk and it is easier to digest. Use it in some of your baked foods, adding a dish of soda to neutralize the sourness. Go easy on the soda - not more than 1/2 teaspoon to one cup of sour milk - or it will leave an unpleasant aftertaste.

DO IT NOW

When trouble comes to you —and it will, in some form —see that it is lightened by the benefits of adequate insurance.

Ration Time RECIPES

As a service to homemakers during these trying times of rationing and scarcities, this newspaper is presenting a series of recipes that are low in point value, low in money cost and high in nutrition value. Reproduced above, is the cover of a 32-page cookbook, "Ration-Time Recipes," which contains additional recipes. This cookbook may be had by writing the National Cotton Council, Box 18, Memphis 1, Tennessee.
