HOUSEHOLD HINTS

A tablespoonful of epsom salts added to the starch will greatly stiffen articles such as men's collars.

Shoe trees may be used in drying wool socks or stockings to prevent them from shrinking.

Shoe racks and bags will keep shoes from being scuffed in the closet.

Sew a piece of strong material inside the back of the cuffs on men's pants. This will prevent that frayed appearance.

Open space between garments hanging in a closet helps them to hold the press and keeps them from getting a stringy look.

Should you lose the end of a zipper, use a tiny safety pin in its place. Wind thread around it to cover.

Look for reinforcements at toes and heels when buying men's socks. Tops should be elastic enough to allow the foot in and out with ease and yet recover their shape to fit snugly.

When food has been spilled on the open coils of the electric range allow it to char, then brush it off with a soft brush.

A small magnet (if you can get one) is a handy item for picking up pins and needles off the sewing room floor.

Dusters that have become very soiled and greasy are more easily cleaned and give better results if a tablespoon of paraffin is added to every gallon of water in which they are washed. Rinse in boiling water and afterwards in cold.

SNAPPY FACTS ABOUT RUBBER

Economic conditions in the Latin-American countries have been greatly influenced by the demand for natural rubber. This is evidenced by the report that Nicaragua shipped to the U. S. 1,267 tons of rubber in 1943 as compared with only 60 tons sent in 1941.

The B-29 Super fortress, our largest aerial weapon, has built into it some 5,000 pounds of rubber, covering more than 200 items. Thirty bullet-sealing fuel tanks alone account for nearly two tons of rubber.

Rubber Director Dewey is authority for the statement that heavy-duty military tires made with 70 per cent synthetic rubber and rayon cord are better than the best military tires made before the war.
