On Monday evening of this week the Ladies of the Methodist Church sponsored a covered dish dinner program honoring the Methodist instructors in the college and the public schools of Ashland, and the Methodist college students, and those students who designated no church preferences. The party was held in the lovely church parlors warmed by the glowing embers of the fireplace. Following the dinner, which was served by the members of the Young Married Peoples Class, the group enjoyed several quartet numbers sung by Bob Lytle, V. Mittag, Paul Byers, and Ed Nelson. Dr. Bruce gave a brief address of welcome. This was followed by a community sing and a 'get-acquainted' period. The 'singspiration' was led by Mrs. Lucille McKay, Mrs. Della Weber at the piano.

The tables and parlors and fireplace were decorated with autumn flowers and leaves and vines and with lighted tapers on the tables.

ning. In one form or another, civilians got most of the increase—in preserving and canning of fruits and vegetables, in larger-than-normal production of condensed milk and in supplemental allotments for other purposes.

Of the 18 persons killed in traffic in September, four, or 22 percent, were pedestrians. This is a reduction from the toll of six pedestrians killed in September of 1943 which was 24 percent of the total fatality list. There were two bicycle deaths this month, compared to one a year ago.

Only two deaths resulted from collisions between motor vehicles this September. A year ago, there were 11 fatalities involving collisions between motor vehicles or 44 percent of the total death toll. There were five from non-collision accidents this September and four from vehicle collisions with fixed objects.

Since speed too great for existing conditions usually is a prime factor in non-collision accidents, while failure to yield right of way or driving on the wrong side of the road are the prime factors in collision accidents, Farrell declared the fatality toll for this September indicated a need for more drivers to watch their speed on rural highways. Speed checks maintained by the traffic engineering division of the state highway department on the Pacific highway indicated only 16 percent of the drivers using this highway in September held their speed below the 35 mile wartime speed limit.

"With vehicles and equipment getting older and with tire replacements uncertain, it is important that drivers hold their speeds down as a conservation measure as well as a safety measure," Farrell declared.
