Flounder's Eye Enables It To Take on Neutral Color

Studies of the winter flounder prove that the eye of this fish is the organ which enables it to take on the color of the sea bottom on which it lies, in order to deceive prey. When the head of the fish was placed against a black background, its entire body turned very dark, and vice versa, says Collier's.

The uncanny ability of this fish to copy a varied background was also shown by putting it against a black- and- white checkerboard which it reproduced well enough to make itself indistinguishable at a distance of ten feet.

That Nagging Backache

May Warn of Disordered Kidney Action

Modern life with its hurry and worry, irregular habits, improper eating and drinking—its risk of exposure and infection—throws heavy strain on the work of the kidneys. They are apt to become over-taxed and fail to filter excess acid and other impurities from the life-giving blood.
You may suffer nagging backache, headache, dizziness, getting up nights, leg pains, swelling—feet constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.
Try Doan's Pills. Doan's help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!
