**SNAPPY FACTS**  
about  
**RUBBER**

Over 300 patents dealing with rubber chemistry are among the 45,000 United States patents seized from aliens and nationals of occupied countries which are now available for licensing to American citizens.

Even at peak production rates, it may take eight years for manufacturers to meet the demand for new automobiles.

In five years the number of synthetic rubber passenger-car tires in this country has risen from a few thousand tires to about 33,000,000.

To combat the shock from contact with icy waters, B. F. Goodrich has produced a new synthetic rubber anti-exposure suit for fliers.
