LOOK YEARS YOUNGER
Taj-Mahal Facial Film is a complete facial without manipulation—for home use. Dampen face and simply apply a few drops of Taj-Mahal. It forms a film and penetrates into enlarged pores. A conditioner for circulation, wrinkles, enlarged black heads... leaving the face in smooth, firm condition.
Sold on positive money back guarantee by mail only. Send check or money order for trial bottle containing approximately 25 facials. \$1.50, Federal tax included.
Taj-Mahal MYSTIC FACIAL

COOKERY HINT
In a meat loaf recipe which calls for ground pork in combination with other ground meat, bulk pork sausage may be substituted for the ground pork.

Sparkling Glassware
An added sparkle in glassware can be obtained if a few drops of ammonia and bluing are added to warm soapsuds.

Binds Soil Particles
Organic matter binds soil particles together like hair in plaster, enabling the particles to resist the action of run-off water.

Long State
Illinois is a long state, extending from 37 degrees latitude in the south to approximately 42 degrees and 30 seconds in the extreme north.

Increase Heating Capacity
Built-in fireplace circulators can increase the heating capacity, but do not replace central heating systems.

Speed Sewing
To speed up sewing and make it easier, make a pin cushion wristlet. It is very simply done. Make a round cushion about two inches thick and three inches wide, and fill it with hair or sawdust. Fasten this to an elastic band that will slip over the hand and wear it in the position of a wrist watch. When pins are not in use, they keep better in a tight box.

Farm Home Accidents
Six thousand people meet death in farm home accidents each year. One million are injured. Facts that include the breakdown of the causes of death in home accidents show falls account for 40 per cent; burns, 25 per cent; careless handling of firearms, 7 per cent, and poison, 6 per cent.

Strong Bees
Bees that live through the winter are reared principally in August and September. A good young queen in the hive before the middle of September will produce a strong force of young bees before freezing weather sets in.

Reduces Frosting
Covering the foods to be stored, particularly the moist ones, will help to slow down the frosting process in refrigerators and reduce the number of times it will be necessary to defrost.

Brought Coffee to U. S.
Captain John Smith, the founder of Virginia, is said to have been the first to bring coffee to America in 1607. The first license to sell coffee was not issued in the United States until 1870.

Thriving Tomatoes
Tomatoes thrive best and bear best in moderate temperatures. Plants require generous amounts of water in hot dry weather. They also need to have side dressings of a good fertilizer or nitrate of soda at intervals of some two weeks to keep them growing and blooming. Keep them free from insects, watered and growing, and when cooler weather comes they should set fruit.

Paper Early Invention
Paper was invented in 105 A. D. by Ta'ai Lun, chief eunuch at the court of China's Emperor Ho Ti. Not until the middle of the last century, however, was it introduced in one of its most widespread present day forms—as a folding box for packaging consumer goods.

USS New Mexico
In 1918, the USS New Mexico was commissioned as the first battleship to be propelled by electricity. Two main generators, each rated at 5,000 horsepower, operated four propulsion motors with a 5,000-horsepower capacity.

Convenient Sun Suit
When making sun suits for children, mothers can save time and strength by selecting a design that is economical and simple to make, easy to put on and take off, and easy to wash and iron.
