### FOR EFFICIENCY FOR ECONOMY

PEOPLE EVERYWHERE are wisely choosing complete electrification . . . and rapidly, too!

Within a short time, most everyone will be using electricity not merely for lighting, but for the big time-and-energy consuming jobs like Refrigeration, Cooking, Water Heating, Laundering, Cleaning and Water Pumping.

The reason is this: Electricity does all the jobs better . . . and cheaper. It's more convenient, quicker, safer, cleaner and more efficient. It saves time, energy, labor . . . increases farm product value.

GO ALL-ELECTRIC: The cost of electricity is low . . . and it drops much lower when you use it freely.

THE MORE YOU USE - THE LOWER THE PRICE
